Falling Off the Mountain Kenn Sharpe, 2023-02-14 Navy Captain Jacob Shaw is close to reaching his professional goal. He is setting himself up to be promoted to Navy admiral and has strong support from politically elected officials and political appointees along with high ranking military officers from the Army Navy and Air Force. Prior to his promotion to Navy captain he meets a woman on a flight from Tampa to Washington DC. They start a love affair and she ends up being the woman he has been looking for his whole adult life. Their relationship grows and together they flourish. Jake and Barbara Rostowski or Bobbie as she likes to be called find a rhythm together where they are far better as a couple than they ever could have been individually. After they have an unusual engagement and a spur of the moment marriage in a way that could only have been orchestrated by Jake they embark on building a good life together. The only thing left for Jake to achieve his pinnacle of success and be at the top of the mountain is making admiral. Then one day Jake's whole life changes. He faces an impenetrable blockade to his dream. But now with Bobbie the love of his life at his side he is ready to start again but with a whole new set of rules. Hospitality, 2001

Design for Sustainability Tracy Bhamra, Vicky Lofthouse, 2016-04-22

Design for Sustainability is a practical approach to design which focuses on the challenges and issues faced by those designing consumer products in the 21st Century. It is written from a design perspective and aimed at both professional and student industrial and product designers and those involved in managing design. The book begins by summarising the historical and current issues of the environmental debate in the context of sustainable product development, highlighting the benefits gained from considering the impact on the environment and issues of sustainability when designing. The authors answer the questions: What is sustainable product development and why is it important? What are the main drivers of sustainable product development? They explain how design can help to control human impact on the environment by not only minimising pollution, waste, energy use and use of scarce resources but also by thinking outside the box to create systems and services that can reduce the number of products manufactured. The aim is to put sustainable development within a commercial context and introduce a new focus for design. Design for Sustainability outlines and assesses the methods, tools and techniques available to designers both for design innovation and design improvement. A wide range of case studies are presented across a number of product sectors including electrical goods, IT and furniture. Initially they demonstrate product improvement and redesign; examples include those that reduce waste, pollution and energy consumption, designing for recycling and reuse of parts. Further examples are then provided exemplifying the more radical approach of system and service design. The final section takes the reader through a whole sustainable design project from start to finish, from brief to manufacture. References and sources of information are also included. *Illinois State Library Top Shelf*, 1971
