Driving Customer Equity Valarie A. Zeithaml, Katherine N. Lemon, Roland T. Rust, 2001-02-21 In their efforts to become more customer focused, companies everywhere find themselves entangled in outmoded systems, metrics, and strategies rooted in their product-centered view of the world. Now, to ease this shift to a customer focus, marketing strategy experts Roland T. Rust, Valarie A. Zeithaml, and Katherine N. Lemon have created a dynamic new model they call Customer Equity, a strategic framework designed to maximize every firm's most important asset: the total lifetime value of its customer base. The authors' Customer Equity Framework yields powerful insights that will help any business increase the value of its customer base. Rust, Zeithaml, and Lemon introduce the three drivers of customer equity: Value Equity, Brand Equity, and Retention Equity, and explain in clear, nontechnical language how managers can base their strategies on one or a combination of these drivers. The authors demonstrate in this breakthrough book how managers can build and employ competitive metrics that reveal their company's Customer Equity relative to their competitors. Based on these metrics, they show how managers can determine which drivers are most important in their industry, how they can make efficient strategic trade-offs between expenditures on these drivers, and how to project a financial return from these expenditures. The final section devotes two chapters to the Customer Pyramid, an approach that segments customers based on their long-term profitability, and an especially important chapter examines the Internet as the ultimate Customer Equity tool. Here, the authors show how companies such as Intuit.com, Schwab.com, and Priceline.com have used more than one or all three drivers to increase Customer Equity. In this age of one-to-one marketing, understanding how to drive Customer Equity is central to the success of any firm. In particular, *Driving Customer Equity* will be essential reading for any marketing manager, and for that matter, any manager concerned with growing the value of the firm's customer base.

The Interaction Field Erich Joachimsthaler, 2020-09-15 Learn how the most successful businesses are creating value and igniting smart growth in a fast-paced competitive market. Most businesses today focus on competition and disruption instead of collaboration, participation, and engagement. They focus on transactions instead of interactions. They seek to optimize or extract value rather than share it. They build assets and thrive on enormous scale, huge distribution networks, and brand recognition. But then along comes a rival that doesn't care much about your brand and your other assets, and it either rushes past you or mows you down. In *The Interaction Field*, management expert and professor Erich Joachimsthaler explains that the only way to thrive in this environment is through the Interaction Field model.

Companies who embrace this model generate facilitate and benefit from data exchanges among multiple people and groups from customers and stakeholders but also from those you wouldn't expect to be in the mix like suppliers software developers regulators and even competitors And everyone in the field works together to solve big industry wide or complex and unpredictable societal problems The future is going to be about creating value for everyone Businesses that solve immediate challenges of people today and also the major social and economic challenges of the future are the ones that will survive and grow *Who's who in Spain* ,2006 Architectural Digest ,2000-04 The international magazine of fine interior design
