Ship Models from Kits Dr David Griffith, 2011-02-28 In the past thirty years the world of model kits has undergone a veritable revolution New techniques in injection moulding have improved the scale accuracy and surface detail of the humble plastic kit while many specialist companies now produce top quality resin models vastly broadening the range of subjects on the market However the really radical change has been the advent of photo etched brass fret which allows the finest detail to be reproduced to scale In ship modelling this has resulted in a new form of

the hobby mid way between traditional build from the box simplicity and the time consuming demands of fabricating everything from scratch These new materials have prompted innovative techniques which are comprehensively demonstrated in this new manual Designed for those wishing to achieve the best results from their ship kits in the 1 700 to 1 350 range of scales it uses step by step photographs to take the reader through the building of two models one in plastic and one in resin from basic construction fittings and detailing to painting finishing and display Written by a highly experienced award winning ship modeller the book is a showcase for the contemporary approach to the hobby Popular Science ,1928-06 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better *MotorBoating* ,1970-01 *Boys' Life* ,1978
