Fundamentals of Transfer Pricing Michael Lang, Giammarco Cotani, Raffaele Petruzzi, 2021-06-18 Transfer pricing is one of the most relevant and challenging topics in international taxation Over the last century nearly every country in the world introduced transfer pricing rules into their domestic legislation Indeed it was estimated that profit shifting generated by the improper application of transfer pricing rules has

resulted in global tax losses worth USD 500 billion for governments 20% of all corporate tax revenues It is thus imperative that all tax professionals thoroughly understand the nature of transfer pricing and how the growing body of applicable rules works in practice In this crucially significant volume stakeholders from government multinational companies international organisations advisory groups and academia offer deeply informed perspectives both general and specific on the practical application of transfer pricing rules taking into consideration all the most recent developments With approximately 160 practical examples and 90 relevant international judicial precedents the presentation proceeds from general to more specialised topics Such aspects of the subject as the following are thoroughly analysed what is transfer pricing and the purpose of transfer pricing rules the arm's length principle and its application the consequences of a transaction not being in accordance with the arm's length principle the transfer pricing methods the mechanisms to avoid and resolve disputes the transfer pricing documentation the attribution of profits to permanent establishments the transfer pricing aspects of specific transactions such as services financing intangibles and business restructurings The application of transfer pricing legislation is arguably the most difficult task that taxpayers and tax authorities around the world must face With this authoritative source of practical guidance government officials tax lawyers in house tax counsel academics advisory firms the business community and other stakeholders worldwide will have all the detail they need to move forward in tackling this thorny aspect of the current tax environment

Books in Series, 1985 Vols for 1980 issued in three parts Series Authors and Titles

Special Features of the UN Model Convention Anna Binder, Viktoria Wöhrer, 2019-10-01 Detailed research on the UN Model Convention s unique features The UN Model Convention has a significant influence on international tax treaty practice and is especially used by emerging and developing countries as a starting point for treaty negotiations Driven by the aim to achieve consistency in the international tax treaty practice the structure and content is to a large extent similar in the UN Model and the OECD Model However whereas the OECD has historically focused its efforts on issues mainly relevant for developed countries the UN Tax Committee has continuously attempted to specifically take into account tax treaty policies for developing countries when drafting and amending the UN Model Convention Compared to the OECD Model Convention the UN Model Convention aims at giving more weight to the source principle Popular examples are the PE definition in the UN Model which provides for a lower threshold than Article 5 of the OECD Model or Article 12A on Fees for Technical Services which has been introduced with the latest amendment of the UN Model Convention 2017 and allows for a withholding tax to be levied on payments to non residents when the payer of the fee is a resident of that contracting State irrespective of where the services are provided Interestingly in the discussions of the tax challenges arising from the digitalization of the economy the OECD and the G20 are also exploring options to allocate more taxing rights to the jurisdiction of the customer and or user i e the market jurisdictions As this has traditionally been the focus of the UN Model Convention its unique features and developing countries practices could be taken into account when exploring new nexus rules that are not constrained by the physical presence requirement This book contains the master s theses of the full time LL M program 2018 2019 for which Special Features of the UN Model Convention has been chosen as the general topic With this book the authors and editors do not aim at discussing each article of the UN

Model Convention but rather focus on the unique features of the UN Model Convention which are explored in detail This is supplemented with an evaluation of the function and relevance of the UN Tax Committee in the international tax policy discussion and with an analysis of the influences of the OECD s BEPS project on the UN Model *Resources in Education*,1989 **You Can Pass the CPA Exam** Debra R. Hopkins,2005-01-21 Each year over 120 000 CPA exam candidates continue to attempt to pass the CPA exam It is a stressful event in the life of an accountant and the stress goes beyond just the knowledge and the exam itself because of the high percentage 85% of first time students who fail This book discusses what really happens at the CPA exam and how the candidate can better control the outcome It provides the expert guidance on the techniques needed to pass today s CPA exam
