Foschia, 2022-09-23 Plasticity in Motion Sport Gender and Biopolitics argues that sport has a transformative power that when engaged with habitually can create bodies with the athletic ability to succeed at the incredible performances that captivate modern sports audiences Robert M Foschia draws heavily from the influential and extensive work of Catherine Malabou on plasticity the ability to shape and form and similarly argues that transformation is not always positive or infinite with the potential for accidents injuries and excommunications However sport as a discursive space often precludes any mention of these negative transformations asserting itself as pure potential and becoming often to the exclusion of the feminine What occurs if the feminine enters into this space Foschia intentionally integrates the feminine back into hypermasculine discussions of sport opening a new realm of possible transformations to the ways we play watch and think about sports Scholars of communication media studies gender studies rhetoric and sports will find this book particularly useful

Feminist New Materialisms Beatriz Revelles Benavente, Monika Rogowska-Stangret, Waltraud Ernst, 2020-03-05 For the editors of this collection new materialisms have always been the entanglement of epistemology ontology ethics and politics Looking back to the notion of situated knowledges Haraway 1988 that among others planted the seed for feminist new materialism van der Tuin 2015 26 one sees how those at least four planes are entangled Rogowska Stangret 2018 in order to bring forth response able Haraway 2008 research New materialism is thus an ethico onto epistemological framework Barad 2007 Revelles Benavente 2018 that by activating its ethico politics helps to diagnose infer and transform gendered environmental anthropocentric social injustices from a multidimensional angle Social injustices are a driving motivation to pursue research and are the reason why the editors and authors of this Special Issue cannot understand new materialism without feminism in the lines of eds Hinton Teusch 2015

Contemporary feminist researchers are providing new materialisms with a transversal approach Yuval Davis 1997 that comes from many different disciplines without canonizing back again knowledge creation and production and in hope that they will not enter back into classifications van der Tuin 2015 It is situated Haraway 1988 research response able Haraway 2008 to material discursive practices that iterate in a dynamic conceptualization of matter **Feminist Methodologies** Wendy Harcourt, Karijn van den Berg, Constance Dupuis, Jacqueline Gaybor, 2022-02-03 This open access book gives insights into feminist methodologies in theory and practice By foregrounding the experiential and embodied nature of doing feminist research this book offers valuable tools for feminist research as a continuous praxis Emerging from a rich collective learning process the collection offers in depth reflections on how feminists shape research questions understand positionality share research results beyond academe and produce feminist intersectional knowledges This book reveals how the authors navigate theory and practice candidly exploring the difficulty of producing knowledge on the edge of academia and activism From different points of view places and disciplinary positions artistic and creative experiments and collaborations the book provides a multi layered analysis This book will be a valuable resource and asset to early career researchers and interdisciplinary feminist students who can learn more about the doing of feminist research from realistic accessible and practical methodological tools and knowledge *Affective Connections* Dorota Golanska, 2017-12-20 Inspired by the philosophical framework of Deleuze and Guattari in relation to affect *Affective Connections* disavows the dominant oppositional discourse around representation to offer an affirmative approach to perception cognition and experience It advances a new materialist concept of synaesthetic perception where synaesthesia is understood as a union of senses This idea offers a new figuration for thinking about our cognition exploring the role of embodied experience and the agency of matter in the production of knowledge Looking at a number of memorials memory sites and artworks relating to the Holocaust the book uses this idea of synaesthetic perception to explore trauma memory and the production of art in relation to painful memories In doing so it demonstrates that modes of interacting with the past and encountering the lived experience of trauma can trigger a deeper understanding of these events and produce more complex forms of affective connections It proposes a shift away from empathy towards sympathy understood in new materialist terms not just as a sentimental response to trauma but as an affective notion that allows for a more comprehensive grasp of experiences of discrimination exclusion suffering or pain **Posthuman Glossary** Rosi Braidotti, Maria Hlavajova, 2018-02-22 If art science and the humanities have shared one thing it was their common engagement with constructions and representations of the human Under the pressure of new contemporary concerns however we are experiencing a posthuman condition the combination of new developments such as the neoliberal economics of global capitalism migration technological advances environmental destruction on a mass scale the perpetual war on terror and extensive security systems with a troublesome reiteration of old unresolved problems that mean the concept of the human as we had previously known it has undergone

dramatic transformations The Posthuman Glossary is a volume providing an outline of the critical terms of posthumanity in present day artistic and intellectual work It builds on the broad thematic topics of Anthropocene Capitalocene eco sophies digital activism algorithmic cultures and security and the inhuman It outlines potential artistic intellectual and activist itineraries of working through the complex reality of the posthuman condition and creates an understanding of the altered meanings of art vis vis critical present day developments It bridges missing links across disciplines terminologies constituencies and critical communities This original work will unlock the terms of the posthuman for students and researchers alike

Diffraction Birgit M. Kaiser, Kathrin Thiele, 2018-10-18 Diffraction patterns in quantum physics evidence the fact that the behavior of matter is the result of its entanglements with measurement or as Karen Barad suggests the entanglement of matter and meaning In this sense therefore phenomena including texts cultural agents or life forms are the results of their relational onto epistemological entanglements and not individual entities that separately pre exist their joint becoming As such diffraction proposes a new understanding of difference no longer a dualist understanding but one going beyond binaries Diffraction is about patterns constellations relationalities From this angle the book explores diffraction which has begun to impact critical theories and humanities debates especially via new materialist feminisms STS and quantum thought but is often used without further reflection upon its implications or potentials Doing just that the book also pursues new routes for the onto epistemological and ethical challenges that arise from our experience of the world as relational and radically immanent because if we start from the ideas of immanence and entanglement our conceptions of self and other culture and nature cultural and sexual difference our epistemological procedures and disciplinary boundaries have to be rethought and adjusted The book offers an in depth consideration of diffraction as a quantum understanding of difference and as a new critical reading method It reflects on its import in humanities debates and thereby also on some of the most inspiring work recently done at the crossroads of science studies feminist studies and the critical humanities This book was originally published as a special issue of Parallax

Breathing Matters Magdalena Górska, 2016-05-16 Breathing is not a common subject in feminist studies Breathing Matters introduces this phenomenon as a forceful potentiality for feminist intersectional theories politics and social and environmental justice By analyzing the material and discursive as well as the natural and cultural enactments of breath in black lung disease phone sex work and anxieties and panic attacks Breathing Matters proposes a nonuniversalizing and politicized understanding of embodiment In this approach human bodies are conceptualized as agential actors of intersectional politics Magdalena Górska argues that struggles for breath and for breathable lives are matters of differential forms of political practices in which vulnerable and quotidian corporeal and corporeal affective actions are constitutive of politics Set in the context of feminist poststructuralist and new materialist and postconstructionist debates Breathing Matters offers a discussion of human embodiment and agency reconfigured in a posthumanist manner Its interdisciplinary analytical

practice demonstrates that breathing is a phenomenon that is important to study from scientific medical political environmental and social perspectives
