**Externalities, Innovation Clusters and Regional Development** Jordi Suriñach,Rosina Moreno,Esther Vayá,2007-01-01 This book begins with a theoretical examination of regional innovation systems agglomeration economics and knowledge spillovers before going on to examine the same concepts within an empirical framework Special emphasis is given to the importance of proximity in the formation of regional innovation systems It concludes by considering innovation and human capital as determinants of regional economic growth The concept of knowledge spillovers is used within the book to explain a number of major economic phenomena including the geographical clustering of inventions the social returns to R and the sizeable disproportions that exist between firms in terms of their R D inputs and outputs The contributors identify that small firms are responsible for far more product innovations than large firms relative to their measurable knowledge resources The book also stresses the importance of a catch up mechanism that sees technological improvement as the combination of two distinct types of activity innovation and imitation In this way the impact of human capital and other types of knowledge acquisition on economic growth is measured The conclusions of the contributors are invaluabley oriented to policy implications This book will appeal to researchers and postgraduate students of regional science and innovation and knowledge as well as policymakers      Successful Science Communication David J. Bennett,Richard C. Jennings,2011-09-29

In the 25 years since the Bodmer Report kick started the public understanding of science movement there has been something of a revolution in science communication However despite the ever growing demands of the public policy makers and the media many scientists still find it difficult to successfully explain and publicise their activities or to understand and respond to people s hopes and concerns about their work Bringing together experienced and successful science communicators from across the academic commercial and media worlds this practical guide fills this gap to provide a one stop resource covering science communication in its many different forms The chapters provide vital background knowledge and inspiring ideas for how to deal with different situations and interest groups Entertaining personal accounts of projects ranging from podcasts to science festivals to student run societies give working examples of how scientists can engage with

their audiences and demonstrate the key ingredients in successful science communication      *Research Impact* Hugh P. McKenna, 2020-10-05 Research for research sake is no longer tenable or affordable to be valuable to society research must have impact This textbook takes the reader on a journey from how the UK Research Excellence Framework assesses impact to real examples of outstanding research impact case studies Along the way Prof Hugh McKenna describes and explains the case for research impact the challenges the link between research impact and evidence informed practice achieving impact through changing policy and engaging with the public how researchers can make their research findings more impactful and how research impact is assessment nationally and internationally It is written in an easily accessible and understandable style with reflective exercises amply distributed throughout its pages and helpful guides helping to engage readers and notably health professionals who are often turned off by the normal heavy research tomes This book makes the complex simple and the wearisome fascinating The short chapters are interesting and authoritative and can be read on a standalone basis allowing readers to dip in and out From his experience in various countries the author has a unique insight into what research impact is how it is assessed and how and where research findings can have the most benefit The stimulus for this book has been the excellent feedback that the author has received from health professionals students and fellow researchers There is always a risk that good knowledge and experience do not transfer well into a good textbook In *Research Impact Guidance on Advancement Achievement and Assessment* nothing has been lost in the transition The book will be of great interest to many health researchers from nursing to midwifery pharmacy medicine or any allied health professional but also to any research manager in all professions who want their research to bring positive change to society culture the economy health and quality of life It will be of particular interest to those who want to understand the difference between research impacts that are weak and those that are outstanding and how such assessments are made      *Cases on Technology Innovation: Entrepreneurial Successes and Pitfalls* Becker, S. Ann, Niebuhr, Robert E., 2010-03-31 This book presents cases on theory research and practice in the areas of technology transfer innovation and commercialization offering illustrations and examples of entrepreneurial successes and pitfalls in university industry government and international settings Provided by publisher      Unplugging the Classroom Hilary Anne Wilder, Sharmila Pixy Ferris, 2017-05-17 *Unplugging the Classroom Teaching with Technologies to Promote Students Lifelong Learning* provides techniques to help teaching and learning in an age where technology untethers instruction from the classroom from semester seat time and from a single source of expertise The book brings together researchers and practitioners from diverse academic fields including library perspectives and presents interdisciplinary discussions from both theoretical and applied areas It is unique in its goal of bringing educators and librarians together to explore the challenges that are faced by students and faculty in any time any place any path and any pace learning In spite of the fact that the mobile revolution has definitively arrived students and faculty alike aren't ready to make the leap to mobile learning The pressures of technological advances along with the changing nature of

learning will demand increasingly profound changes in education Researchers have begun to address this issue but the revolution in mobile communication has not been accompanied by a concomitant growth in pedagogical resources for educators and students More importantly such growth needs to be under girded by sound learning theories and examples of best practice Provides a hands on resource useful to both novices and experts for technology enabled teaching and learning Gives both discipline specific and cross disciplinary perspectives Discusses discipline specific mobile applications Offers an opportunity to meet the needs of contemporary learners and foster their competencies as lifelong learners Addresses emerging issues in technology and pedagogy
