Bambara groundnut: Utilization and Future Prospects Victoria A. Jideani,Afam I. O. Jideani,2021-09-27 The Bambara groundnut BGN or Vigna subterranea is an extremely hardy grain legume As it produces reasonable yields even under conditions of drought and low soil fertility it is also a climate smart crop Previously underutilized BGN is the subject of growing interest among researchers and consumers for its balanced nutritional profile Indigenous consumers of BGN report medicinal benefits from the plant however such knowledge is at risk of being lost with

the urbanization and changing lifestyles of younger generations To date there is no comprehensive resource on the Bambara groundnut despite market demand for plant proteins around the globe Authored by scientists who have researched and developed patents using BGN Bambara Groundnut Utilization and Future Prospects aims to fill this gap The text provides in depth coverage on breeding food and feed utilization medicinal benefits and future research prospects Drawing on both indigenous knowledge and cutting edge research Bambara Groundnut is the first book to fully explore the potential of this remarkable crop

Measuring the Evolution Controversy Avelina Espinosa,Guillermo Paz-y-Miño-C,2016-05-11 The reality of evolution is indisputable and based on current scientific evidence all people in the world should accept it as fact Yet only 41% of adults worldwide embrace evolution and they do it under the premise that a deity created humans One in every three people is a strict creationist who believes in religious scriptures concerning the origin of our universe and of humans and explicitly rejects that Homo sapiens is an ape when in fact science informs us that humans closest relatives are chimpanzees bonobos gorillas and orangutans Indeed we are all apes Why do people not accept evolution In Measuring the Evolution Controversy Guillermo Paz y Mi o C and Avelina Espinosa postulate that the debate over evolution and science versus creationism is inherent in the incompatibility between scientific rationalism empiricism and the belief in supernatural causation religion and faith Belief disrupts distorts delays or stops the comprehension and acceptance of scientific evidence The authors refer to this proposal as the incompatibility hypothesis IH the conceptual foundation of this book Paz y Mi o C and Espinosa explain that the evolution controversy is not only measurable descriptively but also testable as in an ordinary field of science To accomplish this they examine three predictions of IH First chronological conflict and accommodation i e the historical re emergence of antagonism between evolution and religion when advances in science continue to threaten the belief in supernatural causation in such situations creationists rejection of and subsequent partial acceptance of the new scientific discoveries are expected Second change in evolution s acceptance as function of educational attainment i e the positive association between acceptance of evolution and level of education Third change in evolution s acceptance as function of religiosity i e the negative association between acceptance of evolution and level of religious beliefs By relying on an ample assessment of the attitudes towards evolution by highly educated audiences i e research faculty educators of prospective teachers and college students in the United States the authors characterise their understanding of science and evolution personal religious convictions and political ideology The authors make recommendations for improving science and evolution literacy as well as evolution s acceptance and conclude by forecasting a probable global socio cultural landscape in which acceptance of science and evolution will take place
