National Forest Inventories Erkki Tomppo,Thomas

Gschwantner, Mark Lawrence, Ronald E. McRoberts, 2009-12-02 Forest inventories throughout the world have evolved gradually over time. The content as well as the concepts and definitions employed are constantly adapted to the users' needs. Advanced inventory systems have been established in many countries within Europe as well as outside Europe as a result of development work spanning several decades in some cases more than 100 years. With continuously increasing international agreements and commitments, the need for information has also grown drastically and reporting requests have become more frequent and the content of the reports wider. Some of the agreements made at the international level have direct impacts on national economies and international decisions e.g. the Kyoto Protocol. Thus it is of utmost importance that the forest information supplied is collected and analysed using sound scientific principles and that the information from different countries is comparable. European National Forest Inventory (ENFI) teams gathered in Vienna in 2003 to discuss the new challenges and the measures needed to get data users to take full advantage of existing NFIs. As a result, the European National Forest Inventory Network (ENFIN), a network of NFIs, was established. The ENFIN members decided to apply for funding for meetings and collaborative activities. COST (European Cooperation in Science and Technology) provided the necessary financial means for the realization of the program.

Managing Forest Ecosystems: The Challenge of Climate Change Felipe Bravo, Valerie LeMay, Robert Jandl, 2017-04-03 Climate change shaped the political agenda during the last decade with three issues as hot topics commonly making the headlines: carbon budgets, impact and mitigation of climate change. Given the significant role that forests play in the climate system as sources, sinks and through carbon trading, this book updates the current scientific evidence on the relationships between climate, forest resources and forest management practices around the world. By including the forest scientists' expertise from around the world, the book presents and updates a depth analysis of the current knowledge and a series of case studies focused on the biological and the economic impacts of climate change in forest ecosystems in Africa, Asia, Europe and North and South America. The book will form a valuable resource for researchers and advanced students dealing with sustainable forestry, climate change issues and the effects of climate change on natural resource management.

welfare evaluation And yet we should Welfare is a broad concern for any animal that we house control or utilize and we utilize invertebrates a lot The Authors start with an emphasis on the values of non vertebrate animals and discuss the need for a book on the present topic The following chapters focus on specific taxa tackling questions that are most appropriate to each one What is pain in crustaceans and how might we prevent it How do we ensure that octopuses are not bored What do bees need to thrive pollinate our plants and give us honey Since invertebrates have distinct personalities and some social animals have group personalities how do we consider this And as in the European Union s application of welfare consideration to cephalopods how do the practical regulatory issues play out We have previously relegated invertebrates to the category things and did not worry about their treatment New research suggest that some invertebrates such as cephalopods and crustaceans can have pain and suffering might also have consciousness and awareness Also good welfare is going to mean different things to spiders bees corals etc This book is taking animal welfare in a very different direction

Academics and students of animal welfare science those who keep invertebrates for scientific research or in service to the goals of humans as well as philosophers will find this work thought provoking instructive and informative **Estudios sociales** Alcántara, Manuel, García Montero, Mercedes, Sánchez López, Francisco, 2018-07-01 El Comit Organizador del 56 Congreso Internacional de Americanistas ICA publica las actas del encuentro celebrado en la Universidad de Salamanca el 15 al 20 de julio de 2018 Bajo el lema Universalidad y particularismo en las Am ricas reflexion sobre la dial ctica entre la universalidad y los particularismos en la producci n de conocimiento un di logo en el que la necesidad de conocer los particularismos de los fen menos sociales pol ticos art sticos y culturales obliga a formular nuevas hip tesis que enriquecen y replantean las grandes teor as generales de las ciencias y las humanidades El car cter interdisciplinario e inclusivo que ha caracterizado al ICA desde su inicio en 1875 como un congreso de estudios de rea en sentido completo hace a n m s significativa esa din mica de producci n de conocimiento Con un planteamiento interdisciplinario e inclusivo ICA re ne a investigadores que estudian el continente americano desde Alaska hasta Tierra de Fuego incluyendo el territorio del Caribe a partir del an lisis de su pol tica econom a cultural lenguas historia y prehistoria As el Comit Organizador les invit participar en el an lisis y la reflexi n sobre las especificidades de las Am ricas y el Caribe con el objetivo de enriquecer las grandes teor as generales The Oxford Handbook of Psychology and Spirituality ,2021-04-19 Postmaterial spiritual psychology posits that consciousness can contribute to the unfolding of material events and that the human brain can detect broad non material communications In this regard this emerging field of postmaterial psychology marks a stark departure from psychology s traditional assumptions about materialism making this text particularly attractive to the current generation of students in psychology and related health and wellness disciplines For the most part Gen Z is implicitly postmaterialist This updated edition of The Oxford Handbook of Psychology and Spirituality codifies the leading empirical evidence in the support and application of postmaterial psychological science Lisa J Miller has gathered together a group of ground breaking
