Curriculum, Schooling and Society in Hong Kong Paul Morris, Bob Adamson, 2010-11-01 Hong Kong is a fascinating place for the study of curriculum. Its schooling system is influenced by the legacies of a Chinese tradition and British colonialism and was developed at a time when around the world that state was taking more responsibility for the education of young people and educational policies were increasingly influenced by the impact of globalization. To this we can add the complexities of Hong Kong as a society one that has witnessed major political and economic changes over the past 150 years or so and particularly since the late 1970s. The dynamics produce an intricate interplay of innovation and conservatism, globalization and localization, liberalism and authoritarianism, devolution and centralization and many other tensions. This book provides a comprehensive introduction to curriculum as a field of study in a way which highlights its inherent dilemmas and complexities by illustrating the diverse ways in which a curriculum can be developed and analyzed. It also presents a specific analysis of the Hong Kong school curriculum and highlights the ways in which the curriculum both reflects and changes in response to broader socio-political shifts. Sixteenth-Century English Dictionaries John Considine, 2022-05-26 This is the first volume in the trilogy *Dictionaries in the English Speaking World 1500-1800* which will offer a new history of lexicography in and beyond the early modern British Isles. The volume explores the dictionaries, wordlists and glossaries that were compiled and read by speakers of English from the end of the Middle Ages to the year 1600. These include the first printed dictionaries in which English words were collected, the dictionaries of Latin used by all educated English speakers from young children to Shakespeare to adult royalty, the dictionaries of modern languages that gave English speakers access to the languages and cultures of continental Europe, dictionaries and wordlists documenting other languages from Armenian to Malagasy to Welsh and a great variety of specialized English wordlists. No unified history has ever surveyed this vast, lively and culturally significant lexicographical output before. The guiding principle of the book and the trilogy is that a story about dictionaries must also be a story about human beings. John Considine offers a full and sympathetic account of those who compiled and used these works and those who supported them financially, paying particular attention to records of dictionary use and its traces in surviving copies. The volume will appeal to all those interested in the languages and literary cultures of the sixteenth-century English-speaking world.
