

Manual Task/Handling Overview

What are Manual Tasks?

A "Manual Task" or "Manual Handling" is any activity that requires the use of force exerted by a person in order to lift, push, pull, carry or otherwise move or restrain an object. There are very few jobs that do not involve some form of manual handling.

Who is responsible for safe manual handling?

A safe manual handling regime at any workplace is a shared responsibility based on the cooperation of everyone. Managers and supervisors have a responsibility to assess the overall safety of the site and everyone else must follow safe work practices.

As an employee you have a responsibility to take care of your body:

- Ask for help or check what the procedure is for any new manual handling task;
- Use the equipment provided for your safety;
- Inform your supervisor if you see any hazards/dangerous manual tasks;
- Ensure your actions don't put others at risk.

When can a manual task be hazardous?

- A repetitive or sustained – Application of force, movement or awkward posture;
- An application of high force – i.e. Heavy lifting or pulling;
- Exposure to sustained vibration – i.e. Long durations on a jack hammer;
- Handling of unstable or unbalanced loads or loads which are difficult to grasp or hold.

Key Points

- Plan the lift – Where you're going, is it clear, what is the best and safest way etc;
- Move your feet – Don't twist your back;
- Follow the BACK principle:
 - **B**end your knees, not your back;
 - **A**bdominal's should be braced when lifting;
 - **C**lose to the load – keep the load close to your body;
 - **K**eep the natural curves of your spine at all times.
