

How To

Write Outstanding Papers Fast

Having difficulties with mastering that 10 pages paper due tomorrow? Just follow these easy steps to create a marvelous paper in just a few hours!

Step 1: The Topic Skeleton

During the story crafting stage of the paper writing process you'll start determining, based on the sources you've discovered so far, what topics you want to cover in your paper. As you work on your argument, you will begin to order these topics into the order that you want them to appear in your paper. Once this ordering is complete, you have constructed a topic skeleton. It describes, at a rough granularity, what you want to talk about and in which order.

Step 2: Fill In Research Gaps

Once you've done with your topic skeleton, consult the sources you discovered during your research process. Make sure you have solid sources for each of the topics in your topic skeleton. If you discover a topic that is lacking in information, go back to the library to find more information to fill in this gap.

Step 3: Dump the Quotes

In the document containing your topic skeleton, start typing, under each topic, all of the quotes from your sources that you think are relevant. Label each quote with the source it came from.

A topic-level outline is huge (close to the size of your finished paper), and flat in structure (no reason to use 18 different levels of indentations here.)

Step 4: Transform, Don't Create

When you write your paper, don't start from a blank document. Instead, make a copy of your topic-level outline and transform it into the finished paper. For each topic, begin writing, right under the topic header, grabbing the quotes you need as you move along. Remember, these quotes are right below you in the document and are immediately accessible.
