

PRESIDENT'S MALARIA INITIATIVE

LIBERIA

Malaria Operational Plan FY 2017

Liberia Malaria Operational Plan Fy 2014

**United States United States Agency
for International Development**

Liberia Malaria Operational Plan Fy 2014:

Liberia United States United States Agency of International Development, 2014-10-31 Malaria prevention and control is a major foreign assistance objective of the U S Government USG In May 2009 President Barack Obama announced the Global Health Initiative GHI a comprehensive effort to reduce the burden of disease and promote healthy communities and families around the world The President e t m s Malaria Initiative PMI is a core component of the GHI along with HIV AIDS tuberculosis maternal and child health family planning and reproductive health nutrition and neglected tropical diseases PMI was launched in June 2005 as a 5 year 1.2 billion initiative to rapidly scale up malaria prevention and treatment interventions and reduce malaria related mortality by 50% in 15 high burden countries in sub Saharan Africa With passage of the 2008 Lantos Hyde Act funding for PMI was extended and the PMI strategy was revised to achieve Africa wide impact by halving the burden of malaria in 70 percent of at risk populations in sub Saharan Africa Programming of PMI activities follows the core principles of GHI encouraging country ownership and investing in country led plans and health systems increasing impact and efficiency through strategic coordination and programmatic integration strengthening and leveraging key partnerships multilateral organizations and private contributions implementing a woman and girl centered approach improving monitoring and evaluation M and promoting research and innovation Liberia began PMI supported activities in FY 2008 Liberia s health infrastructure was severely damaged during the long civil war which ended in 2003 leaving only about 45% of the population with access to essential health services The entire population of approximately 3.8 million is at risk for malaria¹ The 2011 Malaria Indicator Survey MIS showed malaria prevalence by microscopy at 28% The National Malaria Control Program NMCP has produced a National Malaria Control Strategy for the years 2010-2015 Liberia has received malaria funding from the Global Fund to Fight Aids Tuberculosis and Malaria Global Fund since 2004 Currently Liberia receives Global Fund support through a consolidated grant made up of Phase 2 of a Round 7 37 million grant and Phase 1 of a Round 10 60 million grant With Phase 1 of the consolidated grant ending in 2013 Liberia is in the process of completing an assessment of Phase 1 and an application for Phase 2 renewal

Global Management of Infectious Disease After Ebola Sam F. Halabi, Lawrence O. Gostin, Jeffrey S. Crowley, 2016-09-28 The 2014-2015 Ebola outbreak in West Africa shocked the world with its devastation and its rapid migration to multiple continents As the systems meant to respond to this sort of epidemic failed the disease exposed not just weaknesses in international infectious disease surveillance and management but the failures of governments humanitarian organizations and international institutions to handle the legal ethical and economic questions that arose with an event of this scale GLOBAL MANAGEMENT OF INFECTIOUS DISEASE AFTER EBOLA unites the insights of Ebola s first responders with those the world s foremost experts in law economics vaccine development and global migration to identify missed opportunities from the Ebola crisis and to apply these lessons to emerging infectious disease threats Framed with critical discussions of both the global health financing infrastructures that precipitated the

response and the ethical and human rights dilemmas that resulted from it this volume is much more than postmortem to an outbreak it is a vital sometimes damning examination of where we've been and where we're going in the face of emerging infectious diseases *Emerging Infectious Diseases*, 2016

Liberia United States United States Agency for International Development, 2016-05-06 This FY 2016 Malaria Operational Plan presents a detailed implementation plan for Liberia based on the strategies of PMI and the National Malaria Control Program NMCP It was developed in consultation with the NMCP and with the participation of national and international partners involved in malaria prevention and control in the country The activities that PMI is proposing to support fit in well with the National Malaria Control strategy and plan and build on investments made by PMI and other partners to improve and expand malaria related services including the Global Fund to Fight AIDS Tuberculosis and Malaria Global Fund malaria grants This plan was developed just after the 2014 2015 Liberia Ebola epidemic subsided The Ebola crisis brought about massive disruptions in public and private health service delivery historic reductions in health system health seeking by the population at large and Ebola related deaths among the health sector workforce Thus this plan was developed during a period characterized by intense government and donor health system restoration and recovery focused efforts in Liberia This document briefly reviews the current status of malaria control policies and interventions in Liberia describes progress to date identifies challenges and unmet needs to achieving the targets of the NMCP and PMI particularly challenges encountered over the previous year as a result of Ebola and provides a description of activities that are planned with FY 2016 funding State, Foreign Operations, and Related Programs Appropriations for 2016 United States. Congress. House. Committee on Appropriations. Subcommittee on State, Foreign Operations, and Related Programs, 2015

Mali United States United States Agency of International Development, 2014-11-01 Malaria prevention and control is a major foreign assistance objective of the U S Government In May 2009 President Barack Obama announced the Global Health Initiative a comprehensive effort to reduce the burden of disease and promote healthy communities and families around the world Through the Global Health Initiative the United States will help partner countries improve health outcomes with a particular focus on improving the health of women newborns and children The President's Malaria Initiative PMI is a core component of the Global Health Initiative along with family planning maternal and child health nutrition HIV AIDS and tuberculosis PMI was launched in June 2005 as a five year 1.2 billion initiative to rapidly scale up malaria prevention and treatment interventions and reduce malaria related mortality by 50% in 15 high burden countries in sub-Saharan Africa With passage of the 2008 Lantos Hyde Act funding for PMI was extended and as part of the GHI the goal of PMI was adjusted to reduce malaria related mortality by 70% in the original 15 countries by the end of 2015 Programming of PMI activities follows the core principles of GHI encouraging country ownership and investing in country led plans and health systems increasing impact and efficiency through strategic coordination and programmatic integration strengthening and leveraging key partnerships multilateral organizations and

private contributions implementing a woman and girl centered approach improving monitoring and evaluation and promoting research and innovation PMI began supporting activities in Mali in 2007 in close collaboration with the National Malaria Control Program NMCP as well as international and national partners With the coup d tat of March 22 2012 in which the democratically elected president was overthrown by the military the U S Government and many other donors suspended foreign aid to the Government of Mali until a democratic solution to the political crisis could be achieved For PMI this meant suspending all assistance and funding to the NMCP and other Ministry of Health MOH entities The U S Department of State authorized some PMI activities on humanitarian grounds such as procurement and distribution of essential malaria commodities however the bulk of PMI projects were temporarily suspended Following intervention by the Economic Community of West African States and the international community Malians agreed on a consensual transitional government currently in place In late July early August 2013 the people of Mali democratically elected a new president who was sworn in on September 4th 2013 As a result the U S Government lifted all restrictions on U S foreign assistance to Mali and authorized immediate return to normal bilateral relations with the Government of Mali including direct support to the MOH

Senegal United States United States Agency of International Development,2014-11-01 Malaria prevention and control is a major foreign assistance objective of the United States Government USG In May 2009 President Barack Obama announced the Global Health Initiative GHI a six year comprehensive effort to reduce the burden of disease and promote healthy communities and families around the world Through the GHI the United States will partner with countries to improve health outcomes with a particular focus on improving the health of women newborns and children The President s Malaria Initiative PMI is a core component of the GHI along with human immunodeficiency virus acquired immunodeficiency syndrome HIV AIDS and tuberculosis PMI was launched in June 2005 as a five year 1.2 billion initiative to rapidly scale up malaria prevention and treatment interventions and reduce malaria related mortality by 50% in 15 high burden countries in sub Saharan Africa With passage of the 2008 Lantos Hyde Act funding for PMI has been extended through fiscal year FY 2014 and as part of the GHI the goal of PMI has been adjusted to reduce malaria related mortality by 70% in the original 15 countries by the end of 2015 Senegal was selected as a PMI country in 2006 Large scale implementation of malaria control activities began in FY 2007 and progressed rapidly with significant progress demonstrated to date This FY 2014 Malaria Operational Plan for Senegal was developed in close consultation with the National Malaria Control Program NMCP and with the participation of all national and international partners involved with malaria prevention and control in the country The activities that PMI is proposing to support with FY 2014 funding fit well with the 2011-2015 National Malaria Control Strategic Plan and build on investments made by PMI and other partners to improve and expand malaria related interventions over the last five years This FY 2014 MOP is designed to support the objective set by the Government of Senegal and stakeholders to engage in the malaria pre elimination phase as data have demonstrated significantly reduced

prevalence in many parts of the country In line with GHI principles PMI has reinforced its efforts to build capacity and integrate across programs The proposed FY 2014 PMI budget for Senegal is 21.6 million of which 43% will be managed directly by local entities institutions Senegal has a population estimated at 13.2 million in 2014 with approximately 2.2 million children less than five years of age and 528,000 pregnant women Malaria is still a major cause of morbidity and mortality and a high priority for the government even though the number of reported cases of malaria has dropped significantly since 2007-2008 While the decline in the first year can be partially ascribed to a change in the malaria case definition that now requires parasitological confirmation of all cases the proportion of all outpatient visits due to confirmed malaria continued to fall from 6% in 2008 to 3% in 2009 From July 2010 to March 2013 routine morbidity and mortality data were not available due to a health worker data retention strike Now that the strike has ended the Ministry of Health MOH is working to catch up with routine data collection for the missing years

Ethiopia United States United States Agency of International Development, 2014-10-31 Malaria prevention and control are major foreign assistance objectives of the U.S. Government USG The purpose of this Malaria Operational Plan MOP is to provide a framework and a rationale for nominating and supporting malaria prevention and control projects in Ethiopia with FY 2014 funding to accomplish the USG's foreign assistance objectives through the President's Malaria Initiative PMI in the context of the Global Health Initiative GHI Through the GHI the USG will help partner countries improve health outcomes with a particular focus on improving the health of women newborns and children The MOP process for PMI Year 7 FY 2014 considers information from the Ethiopian Federal Ministry of Health FMOH Regional Health Bureaus including the Oromia Regional Health Bureau ORHB international malaria program donors including the Global Fund to Fight AIDS Tuberculosis and Malaria Global Fund malaria subject matter experts and other malaria program stakeholders about the malaria situation and the malaria control program capacities and gaps in Ethiopia The President's Malaria Initiative is a core component of the GHI along with health programs for HIV/AIDS and Tuberculosis PMI was launched in June 2005 to rapidly scale up malaria prevention and treatment interventions and reduce malaria related mortality by 50% in selected high burden countries in sub-Saharan Africa Other PMI goals include removing malaria as a major public health problem promoting development in the Africa region strengthening malaria control activities and containing the spread of antimalarial drug resistance The programming of PMI activities follows the core principles of GHI encouraging country ownership and investing in country led plans and health systems increasing impact and efficiency through strategic coordination and programmatic integration strengthening and leveraging key partnerships multilateral organizations and private contributions implementing a woman and girl centered approach improving monitoring and evaluation and promoting research and innovation Malaria is ranked as the leading communicable disease in Ethiopia accounting for about 30% of the overall Disability Adjusted Life Years lost Approximately 68% of the total population of 84.3 million lives in areas at significant risk of malaria According to the FMOH in 2010-2011

malaria was the leading cause of outpatient visits accounting for 15% of all visits and health facility admissions with 15% of all admissions Malaria is one of the top ten causes of in patient deaths among children less than five years of age and adults President e t m s Malaria Initiative support to malaria prevention and control in Ethiopia began in FY 2008 with an initial focus on Oromia Regional State the largest of Ethiopia e t m s nine regional states covering a third of the country Ethiopia has received four malaria grants from the Global Fund in recent years PMI has contributed between 20 and 43 million annually to malaria control efforts in Ethiopia during the last five years

Angola: Malaria Operational Plan FY 2014 United States United States Agency of International Development, 2014-10-31 Malaria prevention and control are major foreign assistance objectives of the U S Government In May 2009 President Barack Obama announced the Global Health Initiative GHI a six year comprehensive effort to reduce the burden of disease and promote healthy communities and families around the world Through the GHI the United States will help partner countries improve health outcomes with a particular focus on improving the health of women newborns and children The President s Malaria Initiative PMI is a core component of the GHI along with HIV AIDS and tuberculosis PMI was launched in June 2005 as a five year 1.2 billion initiative to rapidly scale up malaria prevention and treatment interventions and reduce malaria related mortality by 50% in 15 high burden countries in sub Saharan Africa With passage of the 2008 Lantos Hyde Act funding for PMI was extended and as part of GHI the goal of PMI was adjusted to reduce malaria related mortality by 70% in the original 15 countries by the end of 2015 Programming of PMI activities follows the core principles of GHI encouraging country ownership and investing in country led plans and health systems increasing impact and efficiency through strategic coordination and programmatic integration strengthening and leveraging key partnerships multilateral organizations and private contributions implementing a woman and girl centered approach improving monitoring and evaluation and promoting research and innovation Angola was selected as one of the first three countries in PMI in June 2005 Given the almost three decade long civil war which ended in 2002 implementation of large scale malaria control activities in Angola has faced serious challenges The country s health infrastructure was severely damaged during the war and it is estimated that only about 40% of the population has access to government health facilities Significant progress has been made in malaria control with the decrease in malaria parasitemia falling from 21.1% in the 2006-7 Malaria Indicator Survey MIS to 13.5% in the 2011 MIS a reduction of almost 40% However malaria continues to be a major health problem accounting for an estimated 35% of the overall mortality in children under five years of age 25% of maternal mortality and 60% of hospital admissions for children under five years of age Malaria transmission is highest in northern Angola while the southern provinces have highly seasonal malaria In February 2009 Angola signed a five year 7.8 million Round 7 malaria grant from the Global Fund to Fight AIDS Tuberculosis and Malaria Global Fund Angola was also successful in a Global Fund Round 10 grant for malaria for 11.1 million The grants were consolidated and after some delays were signed on June 15 2012 The United Nations Children s Fund and the World Health Organization have been major

partners of the National Malaria Control Program NMCP in scaling up interventions An effective partnership with ExxonMobil has resulted in donations of 4.5 million to the United States Agency for International Development USAID over the last seven years to further PMI and Government of the Republic of Angola's GRA efforts in the fight against malaria

Nigeria United States Agency of International Development, 2014-11-01 Malaria prevention and control are major foreign assistance objectives of the U.S. Government USG In May 2009 President Barack Obama announced the Global Health Initiative GHI a multi year comprehensive effort to reduce the burden of disease and promote healthy communities and families around the world Through the GHI the United States is helping partner countries improve health outcomes with a particular focus on improving the health of women newborns and children The President's Malaria Initiative PMI is a core component of the GHI along with Human Immunodeficiency Virus Acquired Immunodeficiency Syndrome HIV AIDS and tuberculosis PMI was launched in June 2005 as a five year 1.2 billion initiative to rapidly scale up malaria prevention and treatment interventions and reduce malaria related mortality by 50% in 15 high burden countries in sub Saharan Africa With passage of the 2008 Lantos Hyde Act funding for PMI was extended and as part of the GHI the goal of PMI was adjusted to reduce malaria related mortality by 70% in the original 15 countries by the end of 2015 Expansion was authorized to additional PMI countries including Nigeria the Democratic Republic of Congo and up to seven additional high burden countries The goal for any new countries added after the initial 15 is to achieve a 50% reduction in malaria related mortality in at risk population by 2015 as compared with 2009-2010 baseline levels These goals will be achieved by reaching 85% coverage of the most vulnerable groups children under five years of age under five and pregnant women with proven preventive and therapeutic interventions including artemisinin based combination therapies ACTs insecticide treated nets ITNs intermittent preventive treatment for pregnant women IPTp and indoor residual spraying IRS With a population of about 172 million and reporting more deaths due to malaria than any country in the world Nigeria became the seventeenth PMI country in 2010 Malaria accounts for 60% of outpatient visits and 30% of hospitalizations among children under five in Nigeria The Demographic and Health Survey DHS 2008 reported an infant mortality of 75 per 1000 live births and an under five mortality of 157 per 1000 live births in the preceding five year period Impressive progress has been made in malaria control efforts in recent years The proportion of households owning one or more ITNs increased from just 8% in the DHS 2008 to 42% in the Malaria Indicator Survey MIS 2010 and the proportion of children under five reported to have slept under an ITN the night before the survey increased from 6% in the DHS 2008 to 29% in the MIS 2010

Rwanda United States Agency of International Development, 2014-11-04 Malaria prevention and control is a major foreign assistance objective of the U.S. Government USG In May 2009 President Barack Obama announced the Global Health Initiative GHI a multi year comprehensive effort to reduce the burden of disease and promote healthy communities and families around the world Through GHI the United States will help partner countries improve health outcomes with a particular focus on

improving the health of women newborns and children Rwanda has been selected as a GHI Plus country The President's Malaria Initiative PMI is a core component of the GHI PMI was launched in June 2005 as a 5 year 1.2 billion initiative to rapidly scale up malaria prevention and treatment interventions and reduce malaria related mortality by 50% in 15 high burden countries in sub Saharan Africa With passage of the 2008 Lantos Hyde Act funding for PMI was extended through FY 2014 Programming of PMI activities follow the core principles of GHI encouraging country ownership and investing in country led plans and health systems increasing impact and efficiency through strategic coordination and programmatic integration strengthening and leveraging key partnerships multilateral organizations and private contributions implementing a woman and girl centered approach improving monitoring and evaluation and promoting research and innovation Rwanda officially became a PMI country in FY 2007 although the USG had been supporting malaria control activities for several years before that Rwanda has scaled up malaria control interventions successfully and has set the ambitious goal of achieving pre elimination status by 2017 In early 2011 Rwanda was one of the first countries in sub Saharan Africa to achieve universal long lasting insecticidal net LLIN coverage with the distribution of over 6.1 million LLINs Rwanda is implementing a universal coverage campaign in 2013 with another national distribution of approximately 6 million LLINs Rwanda's indoor residual spraying IRS has targeted high burden districts and sectors based on available evidence Rwanda has conducted nine IRS rounds to date and has withdrawn IRS operations in certain districts due to reduction in malaria incidence transmission and funding Rwanda currently sprays two rounds annually in three high malaria burden districts that border malaria endemic neighbors In 2013 Rwanda developed and is implementing an insecticide resistance management IRM plan that builds upon their Integrated Vector Management IVM strategy Rwanda will change the insecticide class it uses in IRS in a phased transition and continue to switch classes every two years based on evidence of insecticide resistance and World Health Organization WHO guidance Progress in case management is equally impressive with great strides in diagnosis and treatment at all levels of the health care system and nationwide integrated community case management In late 2009 the MOH through its Malaria and Other Parasitic Diseases Division termed in this MOP the National Malaria Control Program or NMCP directed that all presumed malaria cases be laboratory confirmed In 2012 HMIS reports indicate that 99% of all patient diagnosed malaria cases are confirmed by microscopy or rapid diagnostic tests before receiving ACTs Community health workers CHWs continue to play a pivotal role in malaria case management and 30 000 of Rwanda's extensive network of 60 000 CHWs are mobilized to implement integrated community case management iCCM diagnosing and treating malaria diarrhea and pneumonia

Malawi United States United States Agency of International Development, 2014-10-31 Malaria prevention and control are major foreign assistance objectives of the U S Government USG In May 2009 President Barack Obama announced the Global Health Initiative GHI a six year comprehensive effort to reduce the burden of disease and promote healthy communities and families around the world with a focus on women and girls The President's Malaria

Initiative PMI is a core component of the GHI along with HIV AIDS and tuberculosis PMI was launched in June 2005 as a five year 1 2 billion initiative to rapidly scale up malaria prevention and treatment interventions and reduce malaria related mortality by 50% in 15 high burden countries in sub Saharan Africa With passage of the 2008 Lantos Hyde Act funding for PMI has now been extended and as part of the GHI the goal of PMI has been adjusted to reduce malaria related mortality by 70% in the original 15 countries by the end of 2015 This will be achieved by continuing to scale up coverage of the most vulnerable groups children under five years of age and pregnant women with proven preventive and therapeutic interventions including artemisinin based combination therapies ACTs insecticide treated nets ITNs intermittent preventive treatment of pregnant women IPTp and indoor residual spraying IRS Malawi became a PMI focus country in 2006 It was one of eight countries selected in FY 2011 as a GHI Plus country and receives additional technical and management assistance to rapidly implement GHI s approach The Ministry of Health s MoH National Malaria Control Program NMCP with support from PMI and other partners has been able to scale up the distribution of ACTs IPTp using sulfadoxine pyrimethamine SP and insecticide treated nets ITN despite a weak health infrastructure The 2012 Malaria Indicator Survey MIS found that 54% of pregnant women reported taking two or more doses of SP for IPTp which is higher than in many African countries Additionally household ITN ownership has increased from 38% in 2006 Multiple Indicator Cluster Survey MICS to 55% in 2012 Similarly children under five and pregnant women who reported sleeping under an ITN the night prior increased from 25% and 8% in 2006 respectively to 56% and 51% in 2012 The 2010 and 2012 MIS also documented a reduction in parasitemia among children under five from 43% to 28% however little or no improvement was noted for most of the other key indicators of progress ITN ownership ITN use and antimalarial treatment and IPTp uptake decreased from 60% in 2010 to 54% in 2012 As the 2012 MIS was completed prior to the 2012 ITN mass distribution campaign 2012 MIS indicators for ITN ownership and use do not reflect the outcome of this campaign

Zimbabwe United States United States Agency of International Development,2014-11-04 Malaria prevention and control are major foreign assistance objectives of the U S Government USG In May 2009 President Barack Obama announced the Global Health Initiative GHI a six year comprehensive effort to reduce the burden of disease and promote healthy communities and families around the world Through the GHI the United States will help partner countries improve health outcomes with a particular focus on improving the health of women newborns and children The President s Malaria Initiative PMI is a core component of the GHI along with HIV AIDS and tuberculosis programs PMI was launched in June 2005 as a five year 1 2 billion initiative to rapidly scale up malaria prevention and treatment interventions and reduce malaria related mortality by 50% in 15 high burden countries in sub Saharan Africa by 2010 With passage of the 2008 Lantos Hyde Act funding for PMI was extended and as part of the GHI the goal of PMI was adjusted to reduce malaria related mortality by 70% in the original 15 countries by the end of 2015 In mid 2011 Zimbabwe s selection as a PMI country was announced Malaria is a major health problem in Zimbabwe with 50% of

the population at risk although its epidemiology varies in the different regions of the country ranging from year round transmission in the lowland areas to epidemic prone areas in the highlands Zimbabwe s National Strategic Plan does not call for the implementation of all interventions in all malarious districts hence the targeted number of districts varies by intervention as detailed below Zimbabwe s malaria program receives support from two major donors the Global Fund and PMI United States Agency for International Development USAID provided targeted support to Zimbabwe s National Malaria Control Program NMCP through an emergency round of indoor residual spraying IRS in 2009 and in 2011 with a procurement of malaria commodities Other malaria donors included UNICEF the United Kingdom Department for International Development DfID and the European Commission However many European donors have shifted their funds to a new multi donor fund designed to strengthen health systems in Zimbabwe the Health Transition Fund The Health Transition Fund is operating from 2011 2015 and aims to improve access to all types of quality health care for Zimbabweans and to harmonize donor support practices and requirements The FY 2014 Malaria Operational Plan was developed in collaboration with the NMCP and aligns well with the National Malaria Control Strategy Planning for FY 2014 was carried out in Zimbabwe in April May 2013 and included representatives from USAID and Centers for Disease Control and Prevention staff based in Washington Atlanta and Zimbabwe The FY 2014 PMI proposed budget for Zimbabwe is 14 million The following major activities will be supported with FY 2014 funding

Mozambique United States United States Agency of International Development, 2014-11-01 Malaria prevention and control are major foreign assistance objectives of the U S Government In May 2009 President Barack Obama announced the Global Health Initiative GHI a six year comprehensive effort to reduce the burden of disease and promote healthy communities and families around the world Through GHI the United States will help partner countries improve health outcomes with a particular focus on improving the health of women newborns and children The President s Malaria Initiative PMI is a core component of the GHI along with HIV AIDS and tuberculosis PMI was launched in June 2005 as a five year 1.2 billion initiative to rapidly scale up malaria prevention and treatment interventions and reduce malaria related mortality by 50% in 15 high burden countries in sub Saharan Africa With passage of the 2008 Lantos Hyde Act funding for PMI was extended and as part of GHI the goal of PMI was adjusted to reduce malaria related mortality by 70% in the original 15 countries by the end of 2015 Programming of PMI activities follows the core principles of GHI Mozambique was selected as a PMI country in fiscal year FY 2007 PMI s primary goal in Mozambique is to assist the Government of Mozambique GoM in collaboration with other partners to reduce malaria mortality by 50% by rapidly scaling up coverage of vulnerable groups with four highly effective interventions artemisinin based combination therapy ACT intermittent preventive treatment of pregnant women IPTp insecticide treated bed nets ITNs and indoor residual spraying IRS Mozambique carried out a Demographic and Health Survey DHS in 2011 While the data from this survey did show a reduction in all cause under five mortality from 138/1000 in the 2008 Multiple Indicator Cluster Survey to 97/1000 in the

2011 DHS there were only minimal improvements in major malaria indicators compared to the 2007 Malaria Indicator Survey MIS highlighting the multitude of challenges the country still faces in reducing the burden of malaria. The most significant improvement from the 2007 MIS to the 2011 DHS was the increase in net coverage: the proportion of households with at least one ITN increased from 15.8% in 2007 to 51.4% in 2011. A joint Malaria Indicator Survey and National HIV/AIDS Indicator Survey is planned for 2014.

Kenya United States Agency of International Development, 2014-10-31 Malaria prevention and control is a major foreign assistance objective of the U.S. Government. In May 2009, President Barack Obama announced the Global Health Initiative (GHI), a comprehensive effort to reduce the burden of disease and promote healthy communities and families around the world. Through the GHI, the U.S. Government will improve health outcomes building upon and expanding successes in addressing specific diseases and issues. The President's Malaria Initiative (PMI) is a core component of the GHI along with HIV/AIDS, maternal and child health, and tuberculosis. PMI was launched in June 2005 as a five-year, \$1.2 billion initiative to rapidly scale up malaria prevention and treatment interventions and reduce malaria-related mortality by 50% in 15 high-burden countries in sub-Saharan Africa. With passage of the 2008 Lantos Hyde Act, funding for PMI has now been extended through FY 2014. A decline in the burden of malaria in Kenya has been observed in recent years due to aggressive efforts to scale up malaria control measures. This has reduced malaria transmission intensity in most parts of the country. In spite of this, moderate to high levels of transmission persist in certain endemic zones, and the 2010 Kenya Malaria Indicator Survey (MIS) confirmed that malaria prevalence remains more than twice as high in rural areas (12%) than in urban areas (5%). Malaria prevalence around Lake Victoria is particularly high at 38%, while prevalence in other epidemiological zones has dropped to less than 5%. Consequently, as part of Kenya's National Malaria Strategy 2009-2017, NMS prevention and control interventions are tailored to the current epidemiology of malaria with efforts concentrated in the lake endemic zone. Kenya has a Round 10 Malaria grant from the Global Fund to Fight AIDS, Tuberculosis, and Malaria (Global Fund) which was signed in early 2012 and has a Phase 1 (September 2011–December 2013) value of over \$38 million. Phase 2 is currently being negotiated. The grant provides critical support for maintaining universal coverage of insecticide-treated nets (ITNs), ensuring a nationwide supply of artemisinin-based combination therapies (ACTs), and implementing the national diagnostic policy to provide malaria rapid diagnostic tests (RDTs) to all health facilities. The funding does not fully cover commodity and programmatic needs, and Kenya relies on external partners to help ensure effective implementation of malaria prevention and control activities. The activities that PMI is proposing for FY 2014 are matched with identified needs and priorities described in the NMS and build on investments designed to improve and expand malaria-related services during the first five years of PMI funding. The proposed FY 2014 PMI budget for Kenya is \$32.4 million.

Madagascar United States Agency of International Development, 2014-10-31 Malaria prevention and control are major foreign assistance objectives of the U.S. Government. In May 2009, President Barack Obama announced

the Global Health Initiative GHI a comprehensive effort to reduce the burden of disease and promote healthy communities and families around the world Through the GHI the United States will help partner countries improve health outcomes with a particular focus on improving the health of women newborns and children The President e t m s Malaria Initiative PMI is a core component of GHI along with HIV AIDS and tuberculosis programs PMI was launched in June 2005 as a 5 year 1 2 billion initiative to rapidly scale up malaria prevention and treatment interventions and reduce malaria related mortality by 50% in 15 high burden countries in sub Saharan Africa by 2010 With passage of the 2008 Lantos Hyde Act funding for PMI was extended and as part of the GHI the goal of PMI was adjusted to reduce malaria related mortality by 70% in the original 15 countries by the end of 2015 Programming of PMI activities follows the core principles of GHI encouraging country ownership and investing in country led plans and health systems increasing impact and efficiency through strategic coordination and programmatic integration strengthening and leveraging key partnerships multilateral organizations and private contributions implementing a woman and girl centered approach improving monitoring and evaluation and promoting research and innovation Madagascar was in the third wave of eight new PMI countries in 2008 which brought the total to 15 focus countries Full implementation began in Madagascar with FY 2008 funding Malaria is a major health problem in Madagascar although its epidemiology varies considerably in different regions of the country On the East Coast transmission is stable and perennial while the West Coast has a long rainy transmission season and a brief dry season Almost one third of the Central Highlands is above 1 500 meters elevation where malaria transmission rarely occurs In the rest of the Central Highlands however transmission is seasonal and moderately unstable with occasional epidemics The semi desert South has highly seasonal and unstable transmission and is also vulnerable to epidemics In the most recent large scale epidemic in the Central Highlands in the late 1980s an estimated 30 000 people died

Liberia United States United States Agency for International Development,2016-12-05 This FY 2017 Malaria Operational Plan presents a detailed implementation plan for Liberia based on the strategies of PMI and the National Malaria Control Program NMCP It was developed in consultation with the NMCP and with the participation of national and international partners involved in malaria prevention and control in the country The activities that PMI is proposing to support fit in well with the National Malaria Control Strategy and plan and build on investments made by PMI and other partners to improve and expand malaria related services including the Global Fund to Fight AIDS Tuberculosis and Malaria Global Fund malaria grants This document briefly reviews the current status of malaria control policies and interventions in Liberia describes progress to date identifies challenges and unmet needs to achieving the targets of the NMCP and PMI and provides a description of activities that are planned with FY 2017 funding

Ghana United States United States Agency of International Development,2014-10-31 Malaria prevention and control is a major foreign assistance objective of the U S Government USG In May 2009 President Barack Obama announced the Global Health Initiative GHI a comprehensive effort to reduce the burden of disease and promote healthy communities and families

around the world Through the GHI the United States will help partner countries improve health outcomes with a particular focus on improving the health of women newborns and children The President's Malaria Initiative PMI is a core component of the GHI PMI was launched in June 2005 as a 5 year 1.2 billion initiative to rapidly scale up malaria prevention and treatment interventions and reduce malaria related mortality by 50% in 15 high burden countries in sub Saharan Africa With the passage of the Lantos Hyde Act funding for PMI was extended and as part of the GHI the goal of PMI was adjusted to reduce malaria related mortality by 70% in the original 15 countries by the end of 2015 This will be achieved by continuing to scale up coverage of the most vulnerable groups children under five years of age and pregnant women with proven preventive and therapeutic interventions including artemisinin based combination therapies ACTs insecticide treated nets ITNs intermittent preventive treatment of pregnant women IPTp and indoor residual spraying IRS Ghana became a PMI country in December 2007 Other donor partners include the Global Fund to fight AIDS Tuberculosis and Malaria Global Fund which has provided an estimated 145 million towards malaria control since 2003 and the Department for International Development DfID whose 5 year 16 million begins in 2013 Malaria is endemic and perennial in all parts of the country with seasonal variations that are more pronounced in the north Ghana's entire population of 24.2 million 2010 Census is at risk of malaria infection but children under five years of age and pregnant women are at higher risk of severe illness due to lowered immunity Transmission is markedly less intense in large urban centers as compared to rural areas The PMI Ghana FY 2014 Malaria Operational Plan MOP was developed in collaboration with the Government of Ghana GOG National Malaria Control Program NMCP and other development partners analyzed malaria control data and trends and reviewed lessons learned over four years of PMI implementation The 2011 Multiple Indicator Cluster Survey MICS provided data on point prevalence of parasitemia as well as information on trends in malaria control interventions The FY 2014 planned budget is 27 million

Uganda United States United States Agency of International Development, 2014-11-01 Malaria prevention and control is a major foreign assistance objective of the U.S. Government USG In May 2009 President Barack Obama announced the Global Health Initiative GHI a comprehensive effort to reduce the burden of disease and promote healthy communities and families around the world Through the GHI the United States will help partner countries improve health outcomes with a particular focus on improving the health of women newborns and children The President's Malaria Initiative PMI is a core component of the GHI along with HIV/AIDS tuberculosis maternal and child health and nutrition PMI was launched in June 2005 as a 5 year 1.2 billion initiative to rapidly scale up malaria prevention and treatment interventions and reduce malaria related mortality by 50% in 15 high burden countries in sub Saharan Africa With passage of the Lantos Hyde Act the PMI goal was adjusted to halve the burden of malaria in 70 percent of the at risk populations of sub Saharan Africa thereby removing malaria as a major public health problem and one of the two objectives for sub Saharan Africa is to reduce malaria related mortality by 70% in the original 15 countries by the end of 2015 of which Uganda is one Malaria is Uganda's leading

cause of morbidity and mortality According to the Ministry of Health MOH malaria accounts for 25 40% of outpatient visits to health facilities and is responsible for nearly half of inpatient pediatric deaths Results of the 2011 Demographic and Health Survey DHS show an improvement over the 2009 Malaria Indicator Survey MIS with 60% of households nationwide owning at least one insecticide treated net ITN 47% of pregnant women and 43% of children under five having slept under an ITN the night before the survey In addition the DHS shows that 43% of children under five had been treated with an antimalarial drug on the same day or the next day after the onset of fever while the proportion receiving an artemisinin based combination therapy ACT was 30% However the UDHS report shows a decline in women receiving intermittent preventive treatment during pregnancy IPTp from 32% to 25% Alongside the efforts of the Government of Uganda PMI the Global Fund and the United Kingdom s Department for International Development DFID are the three main contributors to malaria control in Uganda with additional support from a range of other donors Uganda has three active grants from the Global Fund Round 7 Phase 2 which will provide an additional 15 5 million ITNs to achieve universal coverage Round 10 Phase 1 and 2 will cover approximately 45 million ACT treatments 6 7 million ITNs and 45 million rapid diagnostic tests RDTs through 2016 In calendar year 2013 DFID in collaboration with PMI Uganda will provide 5 million ITNs to contribute to the universal coverage campaign planned for later in the year World Vision is providing additional 500 000 ITNs

Guinea United States Agency of International Development, 2014-10-31 Malaria prevention and control are major foreign assistance objectives of the U S Government In May 2009 President Barack Obama announced the Global Health Initiative GHI to reduce the burden of disease and promote healthy communities and families around the world The President e t m s Malaria Initiative PMI is a core component of the GHI along with Human immunodeficiency virus acquired immunodeficiency syndrome tuberculosis maternal and child health family planning and reproductive health nutrition and neglected tropical diseases PMI was launched in June 2005 as a five year 1 2 billion initiative to rapidly scale up malaria prevention and treatment interventions and reduce malaria related mortality by 50% in 15 high burden countries in sub Saharan Africa With the passage of the 2008 Lantos Hyde Act funding was extended and as part of the GHI the goal of PMI was adjusted to reduce malaria related mortality by 70% in the original 15 countries by the end of 2015 Programming of PMI activities follows the core principles of GHI encouraging country ownership and investing in country led plans and health systems increasing impact and efficiency through strategic coordination and programmatic integration strengthening and leveraging key partnerships multilateral organizations and private contributions implementing a woman and girl centered approach improving monitoring and evaluation M and promoting research and innovation In June 2011 Guinea was selected to receive funding during the sixth year of PMI Guinea has year round malaria transmission with high transmission from July through October in most areas Malaria is considered the number one public health problem in the country National statistics in Guinea show that among children less than five years of age malaria accounts for 31% of consultations 25% of

hospitalizations and 14% of hospital deaths in public facilities A Demographic and Health Survey DHS was carried out in mid 2012 and the results provide concrete baseline information for key malaria indicators The DHS reported a wide range of malaria prevalence across Guinea s regions ranging from 66% in Faranah to 3% in Conakry but with a relatively high prevalence of 44% as the national average Survey estimates show that approximately 47% of households own at least one insecticide treated net ITN and 26% and 28% of children under five and pregnant women respectively slept under an ITN the night before the survey Roughly 18% of women surveyed had received at least two doses of intermittent preventive treatment during their last pregnancy and less than 1% of children under five with fever in the two weeks preceding the survey received artemisinin based combination therapy ACT on the same or next day of fever development

Decoding **Liberia Malaria Operational Plan Fy 2014**: Revealing the Captivating Potential of Verbal Expression

In a period characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its power to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring. Within the pages of "**Liberia Malaria Operational Plan Fy 2014**," a mesmerizing literary creation penned by a celebrated wordsmith, readers set about an enlightening odyssey, unraveling the intricate significance of language and its enduring impact on our lives. In this appraisal, we shall explore the book's central themes, evaluate its distinctive writing style, and gauge its pervasive influence on the hearts and minds of its readership.

Liberia Malaria Operational Plan Fy 2014 Introduction

In today's digital age, the availability of Liberia Malaria Operational Plan Fy 2014 books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Liberia Malaria Operational Plan Fy 2014 books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Liberia Malaria Operational Plan Fy 2014 books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Liberia Malaria Operational Plan Fy 2014 versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Liberia Malaria Operational Plan Fy 2014 books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Liberia Malaria Operational Plan Fy 2014 books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Liberia Malaria Operational Plan Fy 2014 books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a nonprofit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts

millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Liberia Malaria Operational Plan Fy 2014 books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Liberia Malaria Operational Plan Fy 2014 books and manuals for download and embark on your journey of knowledge?

FAQs About Liberia Malaria Operational Plan Fy 2014 Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Liberia Malaria Operational Plan Fy 2014 is one of the best book in our library for free trial. We provide copy of Liberia Malaria Operational Plan Fy 2014 in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Liberia Malaria Operational Plan Fy 2014. Where to download Liberia Malaria Operational Plan Fy 2014 online for free? Are you looking for Liberia Malaria Operational Plan Fy 2014 PDF? This is definitely going to save you time and cash in something you should think about.

central net force model additional practice problems - Sep 10 2022

web force model additional practice problems pdf central net force model 4 orbital ankrumax de circular motion and gravitation review answers 3 central net force model worksheet 4 orbital motion central net force model additional practice problems net force particle worksheets 1 amp 2 youtube

central net force model 4 orientation sutd edu sg - Nov 12 2022

web central net force model 4 porter s five forces strategy skills training from may 2nd 2018 porter s five forces assess the threats to the profitability of your what is the impact of porter s company having folded in 2012 on the effectiveness of his model

central net force worksheet answers studocu - Sep 22 2023

web through the 4 meter radius curve to produce a 200 n downward normal force on the child draw a quantitative force diagram for the child modeling instruction amta 2013 1 u7 central force model review v3 f n 5000n f g 1000n f n 500n f g 600n f n 4000n f g 700n a b c d e f 2 2 2 2 40 10 400 400 200 600 600

date pd central net force model worksheet 4 orbital motion - Apr 17 2023

web modeling instruction amta 2013 1 u7 central force model ws4 v3 1 name date pd central net force model worksheet 4 orbital motion 1 suppose you are at mission control on the moon in charge of launching a moon orbiting communications satellite a first how much would a 1500 kg satellite weigh at the surface of the moon

central net force model 4 orientation sutd edu sg - Dec 13 2022

web april 19th 2018 central net force model net m v2 r 4 a net force causing circular motion is also called the central net force for an object in orbital motion is provided central net force model worksheet 4 orbital motion

central net force model worksheet 4 orbital motion muncysd org - May 18 2023

web central net force model worksheet 4 orbital motion pd 1 suppose you are at mission control on the moon in charge of launching a moon orbiting communications satellite moon mass 7 36 10²² kg moon radius 1 74 10⁶ m a

what is central force equations examples fields and faqs - Oct 11 2022

web the central force in classical mechanics is defined as the force that is acting on an object which is directed along the line joining the object and the origin the magnitude of the central force depends only on the distance between the object and the centre

download free central net force model 4 cyberlab sutd edu sg - Feb 15 2023

web central net force model 4 handbook of peridynamic modeling mar 25 2022 this handbook covers the peridynamic modeling of failure and damage peridynamics is a reformulation of continuum mechanics based on integration of interactions rather than spatial differentiation of displacements the book extends the classical theory of continuum

fact sheet saf c4 command integrates c4 and cyber defence - May 06 2022

web jun 30 2017 the singapore armed forces saf c4 command is set up to coordinate and implement c4 command control communications and computers and cyber defence operations and capabilities it will operate and defend saf networks that support a full spectrum of saf operations in both peace and war

central net force particle model studyres - Jul 08 2022

web name date pd central net force particle model review sheet d a f c e b 1 amta 2013 1 u7 central force model review v3 1 fg 400n 5 exiting the loop at valley e the 2000 kg rollercoaster exerts a downward normal force on the track of 90 000 n

central net force model worksheet 4 orbital motion - Mar 04 2022

web jul 30 2023 07 u8 ws 403 u7 ws1key central net force model worksheet 4 orbital motioncentral motion forces 12 s080501m net forcesanswer key force worksheet conduction model particle newton law charging methods objects chapter forces component solved 2 design an experiment to find the relationshipsolved lab 2

net force definition and calculations study com - Aug 09 2022

web forces don t always cancel out though for example if there are two forces acting toward the right and they are both 5 n then we have 5 + 5 = 10
