**Modular and Prefabricated MEP Systems: Reducing Construction Time and Improving Quality Control** Charles Nehme, 2025-10-22 The global construction industry is at a pivotal inflection point. Faced with relentless demands for accelerated schedules, stringent quality standards, heightened safety requirements, and increasing cost pressures, traditional stick-built construction methodologies are proving insufficient. Nowhere are these challenges more pronounced than in the complex domain of Mechanical, Electrical, and Plumbing (MEP) systems, the lifeblood of any modern structure. This book serves as a definitive guide to the paradigm shift represented by Modular and Prefabricated MEP Systems. It moves beyond simply outlining the benefits of speed and cost reduction, providing a rigorous end-to-end framework for implementation. We explore the profound synergy between Design for Manufacturing and Assembly (DfMA), advanced digital workflows like BIM, and the disciplined, quality-controlled environment of off-site fabrication. Our goal is to equip industry professionals, from early stage conceptualizers to final stage commissioning agents, with the practical knowledge and strategic foresight needed to successfully integrate modular MEP into their projects. By mastering these principles, stakeholders can achieve superior project outcomes: dramatically reduced construction time, unparalleled quality control, and a predictable path to project delivery. This is not just an alternative method; it is the essential future of built environment systems. *AI AND DIGITAL TECHNOLOGIES IN CONSTRUCTION* MS. MICHELLE SHAH, DR. A. N. SWAMINATHAN, MR.
