Consensual Violence Jill D. Weinberg,2016-05-31 In this novel approach to understanding consent Jill D Weinberg presents two case studies of activities in which participants engage in violent acts competitive mixed martial arts MMA and sexual sadism and masochism BDSM Participants in both cases assent to injury and thereby engage in a form of social decriminalization using the language of consent to render their actions legally and socially tolerable Yet these activities are treated differently under criminal battery law sports including MMA are generally absolved from the charge of criminal battery whereas BDSM often represents a violation of criminal battery law Using interviews and ethnographic observation Weinberg argues that where law authorizes a person s consent to an activity as in MMA consent is not meaningfully constructed or regulated by the participants themselves In contrast where law prohibits a person s consent to an activity as in BDSM participants actively construct and regulate consent A synthesis of criminal law and ethnography Consensual Violence is a fascinating account of how consent is framed among participants engaged in violent acts and lays the groundwork for a sociological understanding of the process of decriminalization
