Calling the Shots Daniel P. Gitterman, 2017-02-14 Modern presidents are CEOs with broad powers over the federal government The United States Constitution lays out three hypothetically equal branches of government the executive the legislative and the judicial but over the years the president as head of the executive branch has emerged as the usually dominant political and administrative

force at the federal level In fact Daniel Gitterman tells us the president is effectively the CEO of an enormous federal bureaucracy Using the unique legal authority delegated by thousands of laws the ability to issue executive orders and the capacity to shape how federal agencies write and enforce rules the president calls the shots as to how the government is run on a daily basis Modern presidents have for example used the power of the purchaser to require federal contractors to pay a minimum wage and to prohibit contracting with companies and contractors that knowingly employ unauthorized alien workers Presidents and their staffs use specific tools including executive orders and memoranda to agency heads as instruments of control and influence over the government and the private sector For more than a century they have used these tools without violating the separation of powers Calling the Shots demonstrates how each of these executive powers is a powerful weapon of coercion and redistribution in the president s political and policymaking arsenal

Corridors of Contagion Victoria Law, 2024-09-10 Tracing the narratives of five incarcerated individuals Sentenced to COVID speaks to the devastating impact of surviving the pandemic inside prison walls Corridors of Contagion brings to light the experiences of five people incarcerated across the United States as they navigate the onset of the pandemic and the many months stretched into years that followed Journalist Victoria Law combines this storytelling with a trenchant analysis of the structural failures of the US carceral system failures that made prisons uniquely vulnerable to COVID 19 outbreaks from overcrowding to solitary confinement from insufficient healthcare to life sentences The book portrays the horrors of continual lockdowns not in the comfort of one s own home but in prisons where routine violence and chaos is made even more unimaginable by the complete lack of control over protection from a terrifying and lethal new virus The pandemic provided an opportunity for lawmakers and policy makers to rethink the nation s addiction to perpetual punishment Instead US jails and prisons doubled down on punishment under the guise of pandemic protections As a result people behind bars experienced increased stress mental health challenges increased violence and higher rates of deaths many of which could have been prevented While the pandemic emergency has been declared over we are continuing to learn more about the extent of its destruction Corridors of Contagion reminds readers about both the particular horrors experienced by people in cages and the continued role of the US as the world s prison nation

Fighting on the Cultural Front Hongshan Li, 2024-04-09 The Cold War conflict between the United States and the People s Republic of China did not only encompass political military diplomatic and economic clashes The two powers also confronted each other on the cultural front Despite a long history of extensive and mostly constructive cultural interactions the two nations cut off existing ties in the late 1940s and early 1950s and established new relationships aimed at attacking and isolating each other Even after Beijing and Washington permitted cultural exchange as part of their effort to normalize diplomatic relations in the 1970s the weaponization of cultural interactions continued Hongshan Li provides a groundbreaking account of the confrontation between the United States and the People s Republic of China on the Cold War s cultural front He investigates the origins evolution and significance of the role of cultural

interactions in the shifting relations between the United States and the PRC from the late 1940s through the late 1970s Li demonstrates that the drastic transformation of U S China cultural interactions not only altered the course of Sino American cultural relations but also shaped the Cold War experience of the two peoples Fighting on the Cultural Front examines topics such as competition and conflicts over Chinese students and scholars stranded in the United States maneuvers on the authorization of journalistic exchanges the establishment of Taiwan as a cultural bastion and Beijing s promotion of its revolutionary ideology through individual U S citizens particularly African Americans This important book offers a new lens on the history of U S China relations and the cultural side of the global Cold War **Muslim Fashion** Reina

Strassfeld,2023-10-03 Trans Talmud places eunuchs and androgynes at the center of rabbinic literature and asks what we can learn from them about Judaism and the project of transgender history Rather than treating these figures as anomalies to be justified or explained away Max K Strassfeld argues that they profoundly shaped ideas about law as the rabbis constructed intricate taxonomies of gender across dozens of texts to understand an array of cultural tensions Showing how rabbis employed eunuchs and androgynes to define proper forms of masculinity Strassfeld emphasizes the unique potential of these figures to not only establish the boundary of law but exceed and transform it Trans Talmud challenges how we understand gender in Judaism and demonstrates that acknowledging nonbinary gender prompts a reassessment of Jewish literature and law *Triumphs and Tragedies of the Modern Presidency* Maxmillian Angerholzer III,James Kitfield,Norman Ornstein,Stephen Skowronek,2016-04-25 Applying the lessons of presidential history this anthology of case studies written by leading political scientists historians and subject matter experts delves into the many facets of the presidency and promotes a greater understanding of the presidency for policymakers academics students and general readers alike Abraham Lincoln once said Fellow citizens we cannot escape history One hundred and fifty years later this statement remains true the lessons of history are increasingly important at a time of political deadlock and growing skepticism of leadership among the American public An established classic in its field Triumphs and Tragedies of the Modern Presidency underscores the importance of looking back to set an intelligent course for the future and promotes a better understanding of the U S presidency This updated and revised second edition offers rare insights on presidential leadership since 2001 and adds considerable new information related to inter term transitions The case studies in this single volume work cover an unparalleled scope of modern presidential history and related topics beginning with the presidency of Franklin

Freedom from Religion and Human Rights Law Marika McAdam, 2017-11-14 Although human rights belong to all persons on the basis of their humanity this book demonstrates that in the practice of international human rights law the freedom to be non religious or atheist does not receive the same protection as the freedom to be religious Despite the claimed universality of freedom of religion and belief contained in article 18 of the International Covenant on Civil and Political Rights the key assertion made is that there is a hierarchy of religion and belief with followers of major established religions enjoying high protection and low regulation at the top and atheists and non believers enduring high persecution and weaker protection at the bottom The existence of this hierarchy is proven and critiqued through three case study chapters that respectively explore the extent to which non religious and atheist rights holders enjoy freedom from proselytism freedom from hate and freedom from the religions of their parents

assessment of the post Arab Spring Constitutions of Egypt and Tunisia and concluding with a specific focus on the rights of sexual minorities and freethinkers Part I provides a theoretical account of the conception of constitutionalism and human rights in Islam compared and contrasted with Western constitutionalism A set of issues where the tension between sharica and human rights is accentuated is analysed against the backdrop of the main Islamic charters of rights Part II conducts a similar assessment based on the Constitutions of Tunisia and Egypt the two main epicentres of the Arab Spring Part III moves to two specific rights in the same countries from the twofold perspective of the Constitutions and international law the freedom from interference in one s intimate life with particular regard to homosexuality and the freedom of holding and expressing nonconventional beliefs deemed unacceptable from the point of view of traditional Islam These issues have been chosen as representative of the most controversial still considered taboo in both legal and social terms hence at the fringes of the debate on individual freedoms Focusing on two overlooked and underexplored issues the work thus pushes the boundaries of the human rights discourse in Muslim contexts
