Pediatrics Hilary McClafferty, 2017-02-24 Pediatric integrative medicine is a rapidly evolving field with great potential to improve the quality of preventive health in children and expand treatment options for children living with chronic disease. Many families actively use integrative therapies making familiarity with the field essential for clinicians working with pediatrics patients. This book provides a clear evidence based overview of the field. Foundations of pediatric health are covered with a goal of reviewing classic information and introducing emerging research in areas such as nutrition science, physical activity and mind body therapies. Complementary medicine therapies are reviewed with an eye to expanding the conventionally trained clinician's awareness about traditional healing approaches. Clinical applications explored include Allergy, Asthma, Mental health, IBS, Bullying, Obesity, Environmental health, ADHD, Autism. The book provides an excellent introduction to a relatively young field and will help the reader understand the scope of current evidence for integrative therapies in children and how to introduce integrative concepts into clinical practice. Integrative Pediatrics is a refreshing must read for all students and health professionals focused on pediatrics especially those new to the field or studying at graduate level.

Integrative Medicine for Children May Loo, 2009 Many parents today are turning to or seeking information about Complementary and Alternative Medicine (CAM) for their children. Whether you initiate alternative therapies or simply need to respond when asked for information or advice it's crucial to have the most recent evidence based information about alternative therapies and know how to safely and effectively integrate them with conventional treatment. This innovative and reliable reference is the ideal resource to have at hand. This book includes a wide range of complementary and alternative therapies focusing on those most often used with children: mind body approaches, manual therapies, lifestyle approaches, alternative systems, energy medicine and biological agents. Within these main categories, therapies such as acupuncture, chiropractic, massage, homeopathy, herbs and magnets are covered. Fifty five common pediatric conditions are comprehensively discussed with diagnostic and evidence based treatment information followed by authoritative information on the major CAM therapies available for treatment of the condition. Whenever possible an integrative approach that combines conventional and alternative approaches is presented.
