

**To what extent was Nationalism during the late 19<sup>th</sup> and early 20<sup>th</sup> centuries in Europe a key cause of World War One?**

The beginning of World War One was marked by the assassination of the heir of the Austro-Hungarian throne, Archduke Franz Ferdinand. However, the assassination was only the penultimate catalyst of a long period of tension between the European nations. Nationalism was a key cause of WW1 but only to a limited extent. Although nationalism was a significant cause, there were multiple other causes that had a greater impact than nationalism. Militarism and the alliance system both played a larger role in the cause of WW1.

Nationalism was one of many significant causes of WW1. Nationalism is defined as a feeling of loyalty within a group of people that are united through the love of their mother nation<sup>1</sup>. Nationalism can often cause individuals to believe that their nation is superior to others<sup>2</sup>. Furthermore, nationalism convinced citizens that they were being threatened by other European countries and their plots for expansion. Germany appeared to be a threat to most European countries due to their desire for more land and power. Although, nationalism was prominent during the lead up to the outbreak of war, it was not the most influential cause. It can be said that nationalism simply caused citizens to rise up and support their government and the choices that they made. There were many mediums of propaganda being publicized in the European nations, which expressed nationalism. A song composed by Ernst Moritz Arndt titled 'What is the German's Fatherland'<sup>3</sup> is a clear example of nationalistic publications in the lead up to WW1. The song says references both German and non-German

Huntley Hayes, 1926 *Reflections on the Commemoration of the First World War* David Monger, Sarah Murray, 2020-11-30 The First World War s centenary generated a mass of commemorative activity worldwide Officially and unofficially individually collectively and commercially locally nationally and internationally efforts were made to respond to the legacies of this vast conflict This book explores some of these responses from areas previously tied to the British Empire including Australia Britain Canada India and New Zealand Showcasing insights from historians of commemoration and heritage professionals it provides revealing insider and outsider perspectives of the centenary How far did commemoration become celebration and how merited were such responses To what extent did the centenary serve wider social and political functions Was it a time for new knowledge and understanding of the events of a century ago for recovery of lost or marginalised voices or for confirming existing clich s And what can be learned from the experience of this centenary that might inform the approach to future commemorative activities The contributors to this book grapple with these questions coming to different answers and demonstrating the connections and disconnections between those involved in building public knowledge of the war to end all wars **China's Road Ahead** Roland Benedikter, Verena Nowotny, 2013-11-22 This book provides a critical commentary on China s situation and future outlook from the perspective of the 2012 13 generational power transfer In this power transfer taking place against the background of an increasingly unstable domestic situation an apparently

outstandingly successful generation of half communist leaders recently increasingly plagued by scandal transferred responsibility to a generation confronted by mixed expectations and factional in fighting Many international observers doubt that the new leadership will have the will or the power to introduce serious reforms in a country that reports 100 000 riots involving more than 500 persons in public areas per year The China of 2013 seems to be in the midst of a transition seldom seen since the 1970s The question is if the resulting hope expressed by Chinese dissidents and Western leaders for a necessary development of China s still largely autocratic system towards a kind of context adequate democracy is plausible

or not Featuring incisive commentary by the authors and interviews with experts on the region's political economy the volume addresses such timely questions as Should rapid democratization of China be the strategic goal of the West or rather a step by step approach towards the rule of law first and illiberal democracy to follow Should the West be more worried about a thriving China or a China in crisis Will China's success contribute to the success of the global community and the world order system or be a threat to it What can the West do to help China develop more participatory and inclusive approaches in order to secure social stability And how can the West strengthen its democratic allies on China's borders

Asian Americans and the Spirit of Racial Capitalism Jonathan Tran, 2022 Any serious consideration of Asian American life forces us to reframe the way we talk about racism and antiracism There are two contemporary approaches to antiracist theory and practice The first emphasizes racial identity to the exclusion of political economy making racialized life in America illegible This approach's prevalence in the academy and beyond now rises to the level of established doctrine The second approach views racial identity as the function of a particular political economy what is called racial capitalism and therefore analytically subordinates racial identity to political economy Jonathan Tran develops arguments in favor of this second

approach He does so by means of an extended analysis of two case studies a Chinese migrant settlement in the Mississippi Delta 1868 1969 and the Redeemer Community Church in the Bayview Hunters Point section of San Francisco 1969 present While his analysis is focused on particular groups and persons he uses it to examine more broadly racial capitalism s processes and commitments at the sites of their structural and systemic unfolding In pursuing a research agenda that pushes beyond the narrow confines of racial identity Tran reaches back to trusted modes of analysis that have been obscured by the prevailing antiracist orthodoxy and proposes reframing antiracism in terms of a theologically salient account of political economy
