Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. Why do you need blood? It carries gasses and nutrients to and from our cells
2. What organ pushes blood through your body? Heart

Gizmo Warm-up

The *Circulatory System* Gizmo shows the **heart** and **blood vessels** that make up the **circulatory system**. Look at the heart.

1. How many chambers does the heart have? 4
2. Turn on **Show labels**. What are the names of the chambers? Right atrium, right ventricle, left atrium, left ventricle
3. Do you see tiny "doors" that open and close as blood is pumped through the heart? yes
These are **heart valves**. Heart valves control the flow of blood through the heart.
4. Click **Heartbeat sound** and listen for the two parts of the heartbeat, nicknamed "lub" and "dub." Observe the heart. (Note: The recording is not in sync with the heart animation.)

What do you think causes heartbeat sounds? The opening and closing of valves in the heart

In fact, the "lub" sound is caused by valves from the **atria** to the **ventricles** closing, and the "dub" sound is caused by the valves from the ventricles to the blood vessels closing.

5. Challenge: Why do you think the left atrium and left ventricle are shown on the right side of the diagram? Because they are the left side of the body, but it is on the observers right
