

Exponential Functions

Exponential Function: a function with a variable as the exponent.

The general form for an exponential function is $y = a \times b^x$ a = initial amt b = growth factor

Be able to graph an exponential function by making a table of values and graphing.

- *Remember the graph is a smooth curve
- *Put arrows on both ends
- *One side NEVER touches the x-axis
(the y-value never = 0)

x	2×2^x	$(2 \times 2)^x$
-2	$2 \times 2^{-2} = 2 \times \frac{1}{4} = \frac{1}{2}$	$(2 \times 2)^{-2} = \frac{1}{16}$
-1	$2 \times 2^{-1} = 2 \times \frac{1}{2} = 1$	$(2 \times 2)^{-1} = \frac{1}{8}$
0	$2 \times 2^0 = 2 \times 1 = 2$	$(2 \times 2)^0 = 1$
1	$2 \times 2^1 = 2 \times 2 = 4$	$(2 \times 2)^1 = 2$
2	$2 \times 2^2 = 2 \times 4 = 8$	$(2 \times 2)^2 = 4$

Given a real-world situation, know how to write a function and use it to answer a question.

Suppose the population of a certain bacteria doubles every 45 minutes. If the population started at 500 bacteria, write a function rule to show the number of bacteria with respect to time. How many bacteria would there be after 3 hours? $f(x) = 500(2)^x$ x = # of 45 min periods so $x = 4$ (45 min $\times 4$ = 3 hrs)

Exponential Growth and Decay

Exponential Growth by Doubling Timeframes, etc. $y = a \times b^x$ for $a > 0$ and $b > 1$

A certain type of bacteria ~~triples~~ its population ~~every 8 hours~~. The population started at 50 cells.

a.) Define variables and write a fn to model this situation. b.) What will the pop. be after 3 days?

$f(x) = 50(3)^x$ x = # of 8-hr periods \rightarrow there are nine 8-hr periods in 3 days

Exponential Growth by a Percentage $y = a \times (1 + r)^x$ *Change r to a decimal (move 2 L.)

*Use this: Population grows with annual % increase OR investments that only compound annually

Savings Suppose your parents deposited \$1,000 in an account paying 4.5% interest compounded annually (once a year) when you were born. How big is the account balance after 18 years.

Define	$y = a \times b^x$	use an exponential function.
Define	Let x = the number of interest periods. Let r = the interest Let a = the initial deposit, \$1,000. Then $b = 1 + r = 1 + 0.045 = 1.045$	
Write	$y = 1000 \times 1.045^x$ $y = 1000 \times 1.045^{18}$ $y = 2075.93$	Circle a year for 18 years or 18 interest periods. Substitute 18 for x . Use a calculator. Round to the nearest cent.

The balance after 18 years will be \$2075.93.

Suresh Kumar, 2013 *Electric Circuit Analysis* is designed for undergraduate course on basic electric circuits The book builds on the subject from its basic principles Spread over fourteen chapters the book can be taught with varying degree of emphasis based on the course requirement Written in a student friendly manner its narrative style places adequate stress on the principles that govern the behaviour of electric circuits *The Application of Laser Light Scattering to the Study of Biological Motion* J. C. Earnshaw, 2013-11-21 Several previous Advanced Study Institutes have concentrated on the techniques of light scattering while the biological applications were not fully explored Many of the techniques are now standardised and are being applied to a wide range of biologically significant problems both in vivo and in vitro While laser light scattering methods are superior to conventional methods there was a general reluctance among biologists to adopt them because of the complexity of the physical techniques and the accompanying mathematical analysis Consequently valuable opportunities for advancing the understanding of the biological problems were being missed Advances in the design and commercial availability of standard light scattering instruments and the availability of standard computer programs made the more widespread use of these techniques a practical reality for the biologist While biologists are unable to cope with the complexities of the physical techniques physicists are generally unaware of the nature and scale of the biological problems The meeting at Maratea was an attempt to bring these two groups together and provide an impetus for the application of laser light scattering techniques to biology This volume differs from the three previous proceedings on laser light scattering in the NATO ASI series B3 B23 B73 in that it has been published in the Life Sciences series rather than the Physics series reflecting the shift in emphasis from the development of a new technique to its application in biology
