## EXTERIOR ANGLES OF A TRIANGLE #2

**Directions:** Find the measurement of each missing angle in the triangles below. Remember, the Exterior Angles Theorem states that the exterior angle is congruent to the sum of the two non-adjacent angles. For example, in Problem 1, the exterior angle (80) is congruent to the sum of the two angles furthest away (60 & 70). Be careful, sometimes you'll need to find the measure of an interior angle.
