## **Extreme Conflict And Tropical Forests World Forests:**

**Extreme Conflict and Tropical Forests** Wil De Jong, Deanna Donovan, Ken-ichi Abe, 2007-04-08 There are many compelling reasons for policymakers to pay more attention to forested regions and invest more resources there Forests provide valuable products and environmental services and several hundred million extremely poor people live near them Perhaps the most compelling reason of all however is that unless policymakers take forest governance seriously and respond better to the needs of the people living there these regions will continue to be breeding grounds for violent conflict banditry and illicit crops From Nicaragua's Atlantic Coast to the jungles of Cambodia there are several dozen countries around the world that have experienced severe breakdowns in law and order in their forested regions In many of these cases those breakdowns had widespread economic social and political consequences that have threatened entire societies You would think that after all of the suffering over the last few decades in the forested regions of Colombia Peru Mexico Guatemala the two Congo's Liberia Mozambique Philippines Solomon Islands Nepal Angola Rwanda Nicaragua Cote d'Ivoire Myanmar Bangladesh India Sri Lanka Indonesia Sierra Leone Senegal Sudan Uganda and Vietnam people would begin to take note After all they don't call it jungle warfare for nothing *CIFOR annual report 2007: pathways to impact* Cifor, 2006-01-01

S. de Jong, 2007-05-24 This book contains an up to date review of the structure and evolution of disk galaxies from both the observational and theoretical point of view It is the proceedings of the Island Universes conference held at the island of Terschelling in July 2005 It brings together a broad range of aspects of disk galaxies structure and dynamics the latest multi wavelength surveys low and high redshift observations theory and observations *The Beginnings of Piezoelectricity* Shaul Katzir, 2007-04-08 Involving electricity elasticity thermodynamics and crystallography several scientific traditions and approaches and leading physicists the history of piezoelectricity provides an advantageous perspective on late nineteenth century physics and its development The beginnings of piezoelectricity the first history of the subject exhaustively examines how these diverse influences led to the discovery of the phenomenon in 1880 and how they shaped its subsequent research until the consolidation of an empirical and theoretical knowledge of the field circa 1895 It studies a particular subdiscipline representative of many similar mundane branches of physics that did not bear revolutionary consequences beyond their field Although most research is of this kind such branches have rarely been studied by historians of science Shaul Katzir's historical account shows that this mundane science was an intriguing intellectual and practical enterprise which involved among other things originality surprises and controversies Thereby it displays the fruitfulness of studying such a field Employing exceedingly rich material Katzir gains interesting insights into the nature of scientific development from this history Among the themes raised here are the sources of a discovery the interplay between molecular atomistic and phenomenological approaches and between scientific practice and protagonists philosophy of science the role of

thermodynamic formulation the interaction of different levels of theories with experiment the use and design of qualitative versus precise quantitative experiments the employment of symmetry in physics and the role of national and local experimental and theoretical traditions Observations regarding these and other issues in this book portray an unexpected picture of turn of the century physics

**Private or Socialistic Forestry?** Matti Palo, Erkki Lehto, 2012-02-15 While deforestation continues at an alarming rate around the world discussions on the range of underlying causes continue The premise is that studying successful transitions from deforestation to sustainable forestry ex post in Finland can provide novel insights into how deforestation in the tropics might be reduced in the future Our fundamental question here is why Finland succeeded to stop deforestation for a century ago and why not the same is feasible in the contemporary tropical countries This book presents a novel integrated theory within which this case study on Finland and contemporary modeling of underlying causes of tropical deforestation are developed Finland remains the world s second largest net exporter of forest products while maintaining the highest forest cover in Europe A transition from deforestation to sustainable industrial forestry took place in Finland during the first part of the 20th century The underlying causes of this transition are compared via our theory with deforestation in 74 contemporary tropical countries Both appear similar and support our theory The interaction of public policies and market institutions has appeared to be critical during this transition The study s findings suggest that private forest ownership with a continuous increase in the real value of forests and alleviation of poverty under non corruptive conditions has been a necessary but not a sufficient condition for this transition In a parallel way public policies have also proved to be a necessary but not sufficient condition in this transition The conclusion is that socialistic forestry along with corruption is artificially maintaining too low values in the tropical forests The opportunity cost of sustainable forestry remains too high and deforestation by extensification of agriculture therefore continues The prevailing socialistic forestry with dominating public forest ownership is by purpose maintaining administratively set low stumpage prices leading to low value of forests wide corruption and continuous forest degradation and deforestation An effective remedy to raise the value of forests is found to be within forestry

**Sustainable Development Goals** Pia Katila, Carol J. Pierce Colfer, Wil de Jong, Glenn Galloway, Pablo Pacheco, Georg Winkel, 2019-12-12 A global assessment of potential and

*Conservation and Development in Cambodia* Sarah Milne, Sango Mahanty, 2015-02-11 Written by leading authorities from Australasia Europe and North America this book examines the dynamic conflicts and synergies between nature conservation and human development in contemporary Cambodia After suffering conflict and stagnation in the late twentieth century Cambodia has experienced an economic transformation in the last decade with growth averaging almost ten per cent per year partly through investment from China However this rush for development has been coupled with tremendous social and environmental change which although positive in some aspects has led to rising inequality and profound shifts in the condition ownership and management of natural resources High deforestation rates declining fish stocks biodiversity loss and alienation of indigenous and rural people from their land and traditional livelihoods are now matters of increasing local and international concern The book explores the social and political dimensions of these environmental changes in Cambodia and of efforts to intervene in and improve current trajectories for conservation and development It provides a compelling analysis of the connections between nature state and society pointing to the key role of grassroots and non state actors in shaping Cambodia s frontiers of change These insights will be of great interest to scholars of Southeast Asia and environment development issues in general

*Extractive Industries and Ape Conservation* Arcus Foundation, 2014-03-27 Current dominant thinking and practice in the private and public sectors asserts that peoples development needs are in conflict with or mutually exclusive to the need to conserve the biosphere on which we depend Consequently we are asked to either diminish development in the name of conservation or diminish conservation in the name of development Efforts to identify complementary objectives or mutually acceptable trade offs and compromises indicate however that this does not always

have to be the case This first volume in the State of the Apes series draws attention to the evolving context within which great ape and gibbon habitats are increasingly interfacing with extractive industries Intended for a broad range of policy makers industry experts decision makers academics researchers and NGOs these publications aim to influence debate practice and policy seeking to reconcile ape conservation and welfare and economic and social development through objective and rigorous analysis

**Corruption in the Aftermath of War** Jonas Lindberg,Camilla Orjuela,2017-10-02 Corruption is a serious concern one which can undermine state legitimacy exacerbate inequality and affect trust between social groups Such effects are particularly problematic in societies that have gone through violent conflict and are struggling to rebuild institutions restore social trust and recover economically While anti corruption measures are increasingly integrated into post conflict programs war time structures and practices of corruption often prevail This book explores corruption in post war societies by focusing on the important issues of power inequality and trust To understand post war power structures and the extent to which they engrain challenge or transform corrupt practices we need to study what kind of peace has emerged The empirical cases in this book offer a variety of post conflict situations demonstrating how corruption is played out in depending on the type and extent of international intervention and in the case of a victor s peace a contested peace a partial peace etc The chapters illustrate the experiences and perceptions of people on the ground in post conflict societies and by giving much space to local dynamics the book shifts the focus from external intervention and actors to local contexts striving for greater understanding of the interplay between corruption power inequality and trust in post war societies This book was originally published as a special issue of Third World Quarterly

of the myriad environmental problems and challenges faced in Southeast Asia This is the first publication of its kind in this field a helpful companion for a global audience and for scholars of Southeast Asian studies from a variety of disciplines

*Forests and People* Thomas Sikor, Johannes Stahl, 2011 As the editors note in their introduction the attention to rights in forestry differs from rights based approaches in international development and other natural resource fields in three critical ways First redistribution is a central demand of activists in forestry but not in other fields Many forest rights activists call for not only the redirection of forest benefits but also the redistribution of forest tenure to redress historical inequalities Second the rights agenda in forestry emerges from numerous grassroots initiatives setting forest related human rights apart from approaches that derive legitimacy from transnational human rights norms and are driven by international and national organizations Third forest rights activists attend to individual as well as peoples collective rights whereas approaches in other fields tend to emphasize one or the other set of rights

*International Law and Governance of Natural Resources in Conflict and Post-Conflict Situations* Daniëlla Dam-de Jong, 2015-06-26 Natural resource wealth is conducive to a country's development Nevertheless the last few decades have shown a harsher reality where natural resources have also triggered financed or fuelled a number of internal armed conflicts Examples include the armed conflicts in Cambodia Sierra Leone Liberia and the Democratic Republic of the Congo which have been financed with the exploitation of a variety of valuable natural resources including diamonds gold timber oil and cocoa The aim of this book is to assess the contribution of international law in ensuring that natural resources are used to promote development and to achieve sustainable peace instead of financing armed conflict For this purpose the author discusses the international legal framework for the governance of natural resources in States in general in situations of armed conflict and as part of conflict resolution and post conflict peacebuilding efforts

**Saving Forests, Protecting People?** John Schelhas, Max J. Pfeffer, 2009-03-16 Tropical forest conservation is attracting widespread public interest and helping to shape the ways in which environmental scientists and other groups approach global environmental issues Schelhas and Pfeffer show that globally driven forest conservation efforts have had different results in different places ranging from violent protest to the discovery of common ground among conservation programs and the various interests of local peoples The authors examine the connections between local values material needs and environmental management regimes *Saving Forests Protecting People* explores that difficult terrain where culture the environment and social policies meet

*Tropical Forests in a Changing Global Context* Morgan de Dapper, 2005 **Armed Conflict and Environmental Damage** Dr. U C Jha, 2014-08-01 Armed conflict and military activities have serious adverse impacts on the environment Modern weaponry troop movements landmines hazardous military waste and the destruction of forests for military use are a few sources of harm to the environment both during armed conflict and peacetime military activities Ecological assaults in combat areas are often kept a secret by the government resulting in even greater humanitarian and environmental harm Environmental degradation is increasingly being recognized

as one of the most significant challenges of the 21st century and its effects are being felt worldwide Both domestic and international legislations have been inadequate in mitigating the impact of military activities This book provides details of the environmental destruction wreaked during international and non international armed conflicts and argues that the existing legal regime for the protection of the environment during armed conflict requires substantial modification It puts forward the view that though it is inconceivable to impose an absolute ban on environmental damage during military operations strengthening and clarifying the existing laws protecting the environment in times of conflict and enforcing environment friendly practices among military forces could go a long way in protecting natural assets of our earth
