Advanced fibre-reinforced polymer (FRP) composites for structural applications F. Taheri, 2013-09-30 There is strong evidence that the oil and gas industry has become increasingly interested in using pipes and risers made of fiber reinforced polymer FRP composite materials Moreover oil and gas exploration nowadays has to be conducted in much deeper water depths 500 1500m and deeper thus requiring more resilient and lighter materials in this section various applications of FRP in relation to pipes and risers are discussed to familiarise the reader with various FRP and hybrid pipes The issues affecting the long term performance of these materials as well as issues involved with joining pipes and risers are also covered Finally the recent trends related to the use of FRP for repair and rehabilitation of deteriorated metallic pipes are presented **Advanced Fibre-Reinforced Polymer (FRP) Composites for Structural Applications** Jiping

Bai, 2013-09-30 Advanced fibre reinforced polymer FRP composites have become essential materials for the building of new structures and for the repair of existing infrastructure Advanced fibre reinforced polymer FRP composites for structural applications provides an overview of different advanced FRP composites and the use of these materials in a variety of application areas Part one introduces materials used in the creation of advanced FRP composites including polyester vinylester and epoxy resins Part two goes on to explore the processing and fabrication of advanced FRP composites and includes chapters on prepreg processing and filament winding processes Part three highlights properties of advanced FRP composites and explores how performance can be managed and tested Applications of advanced FRP composites including bridge engineering pipe rehabilitation in the oil and gas industry and sustainable energy production are discussed in part four With its distinguished editor and international team of expert contributors Advanced fibre reinforced polymer FRP composites for structural applications is a technical resource for researchers and engineers using advanced FRP composites as well as professionals requiring an understanding of the production and properties of advanced FRP composites and academics interested in this field Provides an overview of different advanced FRP composites and the use of these materials in a variety of application areas Introduces materials used in the creation of advanced FRP composites including polyester vinylester and epoxy resins Explores the processing and fabrication of advanced FRP composites and includes chapters on prepreg processing and filament winding processes *Corrosion-Resistant Plastic Composites in Chemical Plant Design*

Mallinson, 2020-09-10 This book covers piping buried pipe duct systems recommendations for fire safety and smoke abrasion resistance of fiberglass reinforced plastic FRP mechanism of FRP corrosion and deterioration grounding of FRP systems and popular fabrication methods of FRP **Research Reporting Series** , 1974 *Process Design Manual for Nitrogen Control*
