Daniel Chazan, Sandra Callis, Michael Lehman, 2009-12-16 This book tells a single story in many voices about a serious and sustained set of changes in mathematics teaching practice in a high school and how those efforts influenced and were influenced by a local university It includes the writings and perspectives of high school students high school teachers preservice teacher candidates doctoral students in mathematics education and other fields mathematics teacher educators and other education faculty As a whole this case study provides an opportunity to reflect on reform visions of mathematics for all students and the challenges inherent in the implementation of these visions in US schools It challenges us to rethink boundaries between theory and practice and the relative roles of teachers and university faculty in educational endeavors
