Designed for the complete novice this title guides you through a sample analysis of survey data and shows you step by step how to use SPSS to complete it **Data Construction and Data Analysis for Survey Research** Raymond

Kent, 2020-05-19 Based on the needs of business marketing and social science students this book provides an accessible and easy to follow guide to survey data analysis The book avoids the more usual statistics driven perspective Rather it provides an intuitive feel for handling survey data by emphasising that data analysis is more about understanding the research objectives what kinds of data have been collected how quantitative data were generated by the process of measurement how to create a data matrix and how to transform raw data before thinking about appropriate statistical calculations The author begins by considering what data are the different kinds of data that surveys generate and the tripartite format of all quantitative data The processes of measurement and the errors that may arise are carefully explained Coverage of the creation and analysis of a data matrix using SPSS is then provided The author then reviews what kinds of statistical procedure are required for what kinds of data and for what purposes The book concludes by giving a review of strategies for coping with all the kinds of practical problems that arise in survey research Reader friendly throughout Data Analysis A Guide to Market and Social Research provides numerous worked examples end of chapter questions and points for further discussion to help reinforce concepts learnt A data diskette containing the worked examples in SPSS is also provided in the back of the book Also available is a companion website with extra features to accompany the text please take a look by clicking below <http://www.palgrave.com/business/kent/index.asp> Statistics and Data Analysis for Engineers and Scientists

Tanvir Mustafy, Md. Tauhid Ur Rahman, 2024-01-10 This textbook summarizes the different statistical scientific and financial data analysis methods for users ranging from a high school level to a professional level It aims to combine the data analysis methods using three different programs Microsoft Excel SPSS and MATLAB The book combining the different data analysis tools is a unique approach The book presents a variety of real life problems in data analysis and machine learning delivering the best solution Analysis methods presented in this book include but are not limited to performing various algebraic and trigonometric operations regression modeling and correlation as well as plotting graphs and charts to represent the results Fundamental concepts of applied statistics are also explained here with illustrative examples Thus this book presents a pioneering solution to help a wide range of students researchers and professionals learn data processing interpret different findings derived from the analyses and apply them to their research or professional fields The book also includes worked examples of practical problems The primary focus behind designing these examples is understanding the concepts of data analysis and how it can solve problems The chapters include practice exercises to assist users in enhancing their skills to

execute statistical analysis calculations using software instead of relying on tables for probabilities and percentiles in the present world

**Statistics for Political Analysis** Theresa Marchant-Shapiro, 2014-01-15 Statistics are just as vital to understanding political science as the study of institutions but getting students to understand them when teaching a methods course can be a big challenge In *Statistics for Political Analysis* author Theresa Marchant Shapiro makes understanding the numbers easy The only introduction to statistics book written specifically for political science undergraduates this book explains each statistical concept in plain language from basic univariate statistics and the basic measures of association to bivariate and multivariate regression and uses real world political examples Students learn the relevance of statistics to political science how to understand and calculate statistics mathematically and how to obtain them using SPSS All calculations are modeled step by step giving students needed practice to master the process without making it intimidating Each chapter concludes with exercises that get students actively applying the steps and building their professional skills through data calculation analysis and memo writing

Modern Survival Analysis in Clinical Research Ton J. Cleophas, Aeilko H. Zwinderman, 2023-05-29 An important novel menu for Survival Analysis entitled Accelerated Failure Time AFT models has been published by IBM international Business Machines in its SPSS statistical software update of 2023 Unlike the traditional Cox regressions that work with hazards which are the ratio of deaths and non deaths in a sample it works with risk of death which is the proportion of deaths in the same sample The latter approach may provide better sensitivity of testing but has been seldom applied because with computers risks are tricky and hazards because they are odds are fine This was underscored in 1997 by Keiding and colleague statisticians from Copenhagen University who showed better sensitive goodness of fit and null hypothesis tests with AFT than with Cox survival tests So far a controlled study of a representative sample of clinical Kaplan Meier assessments where the sensitivity of Cox regression is systematically tested against that of AFT modeling has not been accomplished This edition is the first textbook and tutorial of AFT modeling both for medical and healthcare students and for professionals Each chapter can be studied as a standalone and using real as well as hypothesized data it tests the performance of the novel methodology against traditional Cox regressions Step by step analyses of over 20 data files stored at Supplementary Files at Springer Interlink are included for self assessment We should add that the authors are well qualified in their field Professor Zwinderman is past president of the International Society of Biostatistics 2012 2015 and Professor Cleophas is past president of the American College of Angiology 2000 2002 From their expertise they should be able to make adequate selections of modern data analysis methods for the benefit of physicians students and investigators The authors have been working and publishing together for 25 years

and their research can be characterized as a continued effort to demonstrate that clinical data analysis is not mathematics but rather a discipline at the interface of biology and mathematics      **Educational Research** Mr. Rohit Manglik,2023-08-23
