With sound evaluation processes in place, districts can effectively evaluate instructional coaches and coaching programs and use data to set goals. Advance Praise for Evaluating Instructional Coaching: It has arrived! The ICG team has pulled through again with a much needed guide providing a thorough process from how to hire, evaluate, support, and retain instructional coaches. This book will empower school leaders to be partners with instructional coaches by providing meaningful evaluation tools and effective coaching programs. Readers will walk away with ideas on how to help coaches grow to best serve students and teachers in their schools. Thank you, ICG! We needed your research knowledge and most of all, your humble approach on how best to support coaches and coaching programs. Kelly Jacobs, District Instructional Coaching Coordinator, Lansing Mich. School District. Instructional coaches devote their time to growing teachers. One way to support instructional coaches in their professional growth is to ensure an effective evaluation system is in place for them. This book gives leaders several things to consider as they define the coach's role, hire candidates, and put an evaluation process in place. Approaches to Studying the Enacted Mathematics Curriculum Kathryn Chval, Dan Heck, Iris Weiss, Steven W. Ziebarth, 2012-09-01. Curriculum materials are among the most pervasive and powerful influences on school mathematics. In many mathematics classes, student assignments, the questions the teacher asks, the ways students are grouped, the forms of assessment, and much more originate in curriculum materials. At the same time, teachers have considerable latitude in how they use their curriculum materials. Two classes making use of the same materials may differ markedly in what mathematics content is emphasized and how students are engaged in learning that content. This volume considers a variety of research tools for investigating the enactment of mathematics curriculum materials, describing the conceptualization, development, and uses of seven sets of tools. Mathematics education researchers, curriculum developers, teacher educators, district supervisors, teacher leaders, and math coaches will find insights that can improve their work and guidance for selecting, adapting, and using tools for understanding the complex relationship between curriculum materials and their enactment in classroom instruction.

How to Build an Instructional Coaching Program for Maximum Capacity Nina Jones Morel, Carla Staton Cushman, 2012-04-24. Chart your course for success! A guide for school and district leaders. Research supports the value of coaches in improving school culture and facilitating change that leads to staff and student success. This comprehensive resource guides school and district leaders through the journey of developing and sustaining an effective coaching program. The authors engage readers with a nautical metaphor that outlines the planning and implementation process, including how to cast a vision for the coaching program, determine desired characteristics of instructional coaches, use data to evaluate and refine the program, communicate the benefits to leaders, principals, and teachers, design appropriate professional training and support.
