EBOOK: Financial Accounting Robert Libby, Daniel Short, Patricia Libby, 2014-04-16 This Global edition has been designed specifically to meet the needs of international financial accounting students. The text successfully implements a real world single focus company approach in every chapter. The companies chosen are engaging and the decision making focus shows the relevance of financial accounting in the real world. In addition to the latest examples of both contemporary and traditional topics, new material has been added to make the content more relevant and improve learning outcomes for the international student. Advanced Financial Accounting Alessandro Cortesi, Patrizia Tettamanzi, Umberto Scaccabarozzi, Ivan Spertini, Stefano Castoldi, 2015-11-02T00:00:00+01:00 Financial statements are the cognitive instrument par excellence to understand a company's profitability, asset trends and financial performance. This volume is divided into three sections and addresses the main themes related to Financial Statements. The first part, Financial Statement analysis, Main objectives and tools, illustrates the techniques commonly used to analyse and interpret financial statements, reformulations of statement of financial position and statement of comprehensive income and ratios. The second part, IFRS Accounting issues, presents the accounting issues of the most significant financial statements, captions in accordance with International Financial Reporting Standards (IFRS) applicable on the date of publication of this manual. Consolidated financial statements are the subject of the third part, presenting the fundamental problems that gradually may arise from the consolidation process. The book is intended for all those students or professionals who intend to deal in a systematic way with the issues of construction and analysis of financial statements. The content of each chapter is enriched by examples with the aim of facilitating understanding.

Advances in Accounting Education Leslie A. Cordie, Anthony H. Catanach Jr., 2008-06-27 Explains how faculty members can improve their teaching methods or how accounting units can improve their curricula programs. **Financial Accounting** Robert Libby, Patricia A. Libby, Daniel G. Short, 2009 Libby Libby Short wrote this text based on their belief that the subject of financial accounting is inherently interesting but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text they considered career relevance as their guide when selecting material and the need to engage the student as their guide to style, pedagogy and design. Libby Libby Short is the only financial accounting text to successfully implement a real world single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real world financial statements. The companies chosen are engaging and the decision making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting. *Forthcoming Books* Rose Arny, 1999 **Engineering Management** C.
