Manual For Stihl Fs 80r

Shasha Hu

Manual For Stihl Fs 80r:

Power Farming in Australia and New Zealand Technical Manual ,1987 Operaciones de desbroce GUTIERREZ VELAYOS, JAVIER,2019-03-21 Uno de los trabajos silvícolas más ampliamente utilizados para manejar la espesura de los montes españoles son las denominadas limpiezas que hacen referencia al cuidado cultural o tratamiento parcial consistente en reducir la presencia de la vegetación accesoria. Cuando se actúa sobre el estrato arbustivo la limpieza se denomina desbroce. A lo largo del primer capítulo del libro se recoge una clasificación de los diferentes tipos de desbroces así como de la variedad de máquinas que los operarios forestales pueden emplear para llevar a cabo esta labor tratando especialmente las denominadas motodesbrozadoras. El estudio se centra fundamentalmente en la amplia variedad de tipos de corte que estas máquinas pueden portar. En el segundo se describen todas aquellas labores y tareas que el operario debe realizar para el cuidado, mantenimiento y puesta a punto de la motodesbrozadora. De igual forma se explica cómo llevar a cabo el montaje de ciertos componentes de la máquina y se ofrecen a modo orientativo algunos consejos acerca del control del desgaste y daños de la máquina. Las técnicas de manejo de la motodesbrozadora de acuerdo al tipo de vegetación a eliminar se exponen en el capítulo tercero. En esta misma sección del libro se muestran las limitaciones que presentan los distintos tipos de corte que puede portar esta máquina. El último capítulo se ha dedicado a la reflexión de los riesgos y peligros que aparecen cuando se maneja una motodesbrozadora y a las medidas que se deben adoptar para prevenirlos. También se aborda la normativa medioambiental que regula la gestión del principal residuo que generan estas máquinas: esto es el aceite de motor usado. Finalmente se expone cómo llevar a cabo el tratamiento adecuado de los restos forestales en aras de cumplir con una buena conducta medioambiental. Esta Unidad Formativa UF1043 Operaciones de desbroce es TRANSVERSAL y está incluida en el Módulo Formativo MF1293_1 Operaciones auxiliares de repoblación, corrección hídrica y de construcción y mantenimiento de infraestructuras forestales y MF1294_1 Operaciones auxiliares en tratamientos silvícolas correspondiente al Certificado de profesionalidad Actividades auxiliares en conservación y mejora de Montes AGAR0309 regulado por el RD 682/2011 de 13 de mayo de la familia profesional Agraria. Según este Real Decreto los contenidos que en esta obra se recogen se corresponden con una duración de 40 horas. Tanto la estructura como el desarrollo del libro se ajustan al citado Real Decreto y más concretamente a los contenidos de la Unidad Formativa Operaciones de desbroce. Javier Gutiérrez Velayos es Dr. Ingeniero de Montes por la Universidad de Valladolid. Ha sido profesor de la Universidad Católica de Vilva donde ha impartido entre otras la asignatura de Aprovechamientos y Certificación Forestal. Ha compaginado dicha labor docente con la actividad investigadora especialmente en el área de la Xilotecnología y en el campo de la Planificación del paisaje y la conservación de la biodiversidad.
