**Adventures in Sound with Max Axiom, Super Scientist** Emily Sohn, 2007 In graphic novel format follows the adventures of Max Axiom as he explains the science behind sound

**Brain-powered Science** Thomas O'Brien, 2010 How can a long metal needle pass through a balloon without popping it How can water flow at very different rates through two identical funnels How can a stick placed on a table under several sheets of newspaper and extended over the edge of a table snap when quickly struck without lifting or tearing the paper Author Thomas O'Brien takes these and 30 more science inquiry activities to a higher level in this book for educators who love to surprise and challenge their students with unanticipated results Using experiments based on the science of a discrepant event an experiment or demonstration in which the outcome is not what students expect O'Brien shows how learners can be motivated to reconsider their preconceived notions and think more closely about what has actually occurred and the underlying scientific explanations What makes this volume more valuable than a mere activity book is the addition of a science education component to the extensive science content found in each activity Each discrepant event is shown to be analogous to a pedagogical principle Speaking directly to teachers O'Brien writes Your participation as teacher as learner experimenter rather than simply passive reader in these minds on activities will lead you to question and help you to revise your implicit assumptions about the nature of science teaching and learning At the same time you will develop expertise with activities that you can use with your own students The dual purpose activities thus allow you to unlock two doors with one key the doors to your own learning and to your students learning The detailed analogies between the activities and science learning make the book an ideal resource for middle and high school teachers science teacher educators and their preservice students and professional development specialists alike This thorough and thought provoking text includes more than 200 up to date

internet resources as well as extensions to each of the physical science biology and chemistry activities bringing the total number of inquiry activities to nearly 120 Most important the author reminds teachers that the study of science is full of surprises and should be both meaningful and fun for students

sciences have alternately led and followed changes in theory and practice resulting in a changing landscape for deaf and hard of hearing individuals and those connected to them This second volume of the The Oxford Handbook of Deaf Studies Language and Education 2003 picks up where that first landmark volume left off describing those advances and offering readers the opportunity to understand the current status of research in the field while recognizing the opportunities and challenges that lie ahead In Volume 2 an international group of contributing experts provide state of the art summaries intended for students practitioners and researchers Not only does it describe where we are it helps to chart courses for the future

The Plight of Potential Emerson Csorba, 2019-03-30 Having grown up in a hyperconnected world millennials are pressured by a lingering feeling that no matter their achievements they can always do more Conventional wisdom suggests that individuals should create and maintain their personal brands and continuously improve themselves so that they can compete in a world that favors the most entrepreneurial and networked Exacerbating these pressures are endless millennial success stories and best of lists educational systems that increasingly view their primary roles as creating adaptable and skilled workers and a growing belief that in order to succeed individuals must position themselves strategically in a rapidly changing world But these trends only promote anxiety and psychological fatigue hindering the cultivation of a long view in lives and careers Individuals are drawn away from themselves losing the spaces for solitude that are necessary for honest selfunderstanding In The Plight of Potential Emerson Csorba blending scholarly research with first hand experience based on his work on intergenerational engagement discusses how millennials can recapture a sense of control in their lives through time and space for solitude This requires that individuals sometimes resist pressures to constantly connect and share and in place of this embrace their limitedness despite society's emphasis on growth and potential

Interfaces Between Language And Cognition Yury Y. Shtyrov, Andriy Myachykov, Christoph Scheepers, 2013-06-28 Cognitive mechanisms underlying linguistic communication do not only rely upon retrieval and processing of linguistic information they also involve constant updating and organizing of this linguistic information in relation with other more general cognitive mechanisms Some existing theoretical models assume such a tight interactive link between domain general and domain specific sources of information in the cognitive organization of the linguistic faculty and during language use Domain specific constraints may include for example grammatical as well as lexical and pragmatic knowledge Domain general constraints comprise processing limitations imposed by the cognitive mechanisms of memory attention learning and social interaction However much of the existing research tends to focus on one or the other of the aforementioned areas while integrative accounts are still rather sparse at present Therefore the aim of this Research Topic of Frontiers in Cognition is to bring together researchers who with in their respective research fields and by using different methodologies represent integrative approaches to the study of language We invite submissions from a wide range of interrelated areas of research cognitive architectures of language aspects of language processing linguistic development bilingualism language embodiment

neuropsychology of linguistic function among others We would like to solicit original research contributions discussing behavioral neurophysiological and computational evidence as well as papers on methodological and or theoretical aspects of the interplay between linguistic and non linguistic cognitive processes      **Rehabilitation R & D Progress Reports** ,1997
