Adolescence is often considered as one of the most challenging, most turbulent and most difficult phases of life for both children and their parents. During this transition from childhood to adulthood, teenagers often seek the possibility of being able to identify themselves as they start to search for their place in this world. They also learn to interact with the other members of the society, define their priorities, and adapt to social norms.

Some teenagers, unfortunately, do not go through this phase quite smoothly. Some even experiment with illegal substances, leading to further damage. Among the biggest problems is when teenagers start being a part of so-called teenage gangs. According to experts, this might be linked to a desire to have respect and authority in the society of teenage hierarchy. Gangs typically attract adolescents who are interested in belonging to a certain community that offers anonymity and security, while being susceptible to peer pressure.

According to studies, the percentage of criminals among teenagers is quite high. This only means that this problem among teenagers being associated in gangs is definitely worth every attention. What is even more disturbing is even after quitting a gang, there is still a tendency to be involved in various illegal activities during adulthood. This can depict that even though a teenager may not commit a crime, for now, he may end up doing it later.

For parents who are concerned about the possibility of children joining gangs, there are certain criteria about the behavior of their children, as well as their appearance, that they have to pay attention to. Parents need to be extremely careful especially when it comes to identifying potential factors that give hints to this tendency. Typically, if a child starts having problems at school, hides activities from you, has unknown friends, wears particular symbols or colors all the time, you may have to check now.

**The Writing Revolution** Judith C. Hochman, Natalie Wexler, 2017-07-27 Why you need a writing revolution in your classroom and how to lead it The Writing Revolution TWR provides a clear method of instruction that you can use no matter what subject or grade level you teach The model also known as The Hochman Method has demonstrated over and over that it can turn weak writers into strong

communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps boost reading comprehension, improve organizational and study skills, enhance speaking abilities, and develop analytical capabilities. The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need repeatedly while also learning content.

**Lesson Design for Differentiated Instruction, Grades 4-9** Kathy Tushman Glass, 2009-01-14 Discover how effective differentiated instruction can support your students' individual learning needs.
