Domestic Violence in the Anglophone Caribbean Ann Marie Bissessar, Camille Huggins, 2022-01-27 Domestic violence continues to be a social problem that is rarely understood or discussed in many parts of the world. The same holds true in the Anglophone Caribbean. The Caribbean context is unique as it was birthed out of colonization which was violent and brutal for those who were forced to migrate from another country as enslaved labor as well as for those who were conquered out of their lands. Most Caribbean islands societies were created and developed by slaves colonizers and indentured servants. This history has left an indelible scar on all involved which is exemplified by the antagonistic way people interact whether it is between races ethnicities religions or gender. Traditionally domestic relationships and causal factors for domestic violence has been investigated from a myriad of perspectives including the ethnic lineage of the participants. However in the Caribbean due to its historic origins domestic violence should also be examined through the lens of its colonial past. This book examines the consequences of allowing domestic violence to perpetuate in the region. It then looks at some of practices used to provide support and find justice for victims and perpetrators in a Caribbean cultural context.

Fentanyl, Inc. Ben Westhoff, 2019-09-03 A four year investigation into the world of synthetic drugs from black market factories to users dealers to harm reduction activists and what it revealed. A deeply human story. Fentanyl Inc is the first deep dive investigation of a hazardous and illicit industry that has created a worldwide epidemic ravaging communities and overwhelming and confounding government agencies that are challenged to combat it. A whole new crop of chemicals is radically changing the recreational drug landscape writes Ben Westhoff. These are known as Novel Psychoactive Substances (NPS) and they include replacements for known drugs like heroin cocaine ecstasy and marijuana. They are synthetic made in a laboratory and are much more potent than traditional drugs and all too often tragically lethal. Drugs like fentanyl K2 and Spice and those with arcane acronyms like 25i NBOMe were all originally conceived in legitimate laboratories for proper scientific and medicinal purposes. Their formulas were then hijacked and manufactured by rogue chemists largely in China who change their molecular structures to stay ahead of the law making the drugs effects impossible to predict. Westhoff has infiltrated this shadowy world. He tracks down the little known scientists who invented these drugs and inadvertently killed thousands as well as a mysterious drug baron who turned the law upside down in his home country of New Zealand. Westhoff visits the shady factories in China from which these drugs emanate providing startling and original reporting on how China's vast chemical industry operates and how the Chinese government subsidizes it. Poignantly he chronicles the lives of addicted users and dealers families of victims law enforcement officers and underground drug awareness organizers in the United States and Europe. Together they represent the shocking and riveting full anatomy of a calamity we are just beginning to understand. From its depths as Westhoff relates are emerging new strategies that may provide essential long term solutions.
