Avery,2021-11-24 This highly interdisciplinary book discusses the phenomenon of life including its origin and evolution against the background of thermodynamics statistical mechanics and information theory Among the central themes is the seeming contradiction between the second law of thermodynamics and the high degree of order and complexity produced by living systems As the author shows this paradox has its resolution in the information content of the Gibbs free energy that enters the biosphere from outside sources Another focus of the book is the role of information in human cultural evolution which is also discussed with the origin of human linguistic abilities One of the final chapters addresses the merging of information technology and biotechnology into a new discipline bioinformation technology This third edition has been updated to reflect the latest scientific and technological advances Professor Avery makes use of the perspectives of famous scholars such as Professor Noam Chomsky and Nobel Laureates John O Keefe May Britt Moser and Edward Moser to cast light on the evolution of human languages The mechanism of cell differentiation and the rapid acceleration of information technology in the 21st century are also discussed With various research disciplines becoming increasingly interrelated today Information Theory and Evolution provides nuance to the conversation between bioinformatics information technology and pertinent social political issues This book is a welcome voice in working on the future challenges that humanity will face as a result of scientific and technological progress

*A Tour through Graph Theory* Karin R Saoub,2017-11-02 A Tour Through Graph Theory introduces graph theory to students who are not mathematics majors Rather than featuring formal mathematical proofs the book focuses on explanations and logical reasoning It also includes thoughtful discussions of historical problems and modern questions The book inspires readers to learn by working through examples drawing graphs and exploring concepts This book distinguishes itself from others covering the same topic It strikes a balance of focusing on accessible problems for non mathematical students while providing enough material for a semester long course Employs graph theory to teach mathematical reasoning Expressly written for non mathematical students Promotes critical thinking and problem solving Provides rich examples and clear explanations without using proofs

The Ethics of Artificial Intelligence Luciano Floridi,2023-07-12 The Ethics of Artificial Intelligence has two goals The first goal is meta theoretical and is fulfilled by Part One which comprises the first three chapters an interpretation of the past Chapter 1 the present Chapter 2 and the future of AI Chapter 3 Part One develops the thesis that AI is an unprecedented divorce between agency and intelligence On this basis Part Two investigates the consequences of such a divorce developing the thesis that AI as a new form of agency can be harnessed ethically and unethically It begins Chapter 4 by offering a unified perspective on the many principles that have been proposed to frame the ethics of AI This leads to a discussion Chapter 5 of the potential risks that may undermine the application of these principles and then Chapter 6 an analysis of the relation between ethical principles and legal norms and a definition of soft ethics as post compliance ethics Part Two continues by analysing the ethical challenges caused by the development and use of AI Chapter 7 evil uses of AI Chapter 8 and good practices when

applying AI Chapter 9 The last group of chapters focuses on the design development and deployment of AI for Social Good or AI4SG Chapter 10 the positive and negative impacts of AI on the environment and how it can be a force for good in the fight against climate change but not without risks and costs which can and must be avoided or minimised Chapter 11 and the possibility of using AI in support of the United Nations Sustainable Development Goals Chapter 12 The book concludes Chapter 13 by arguing in favour of a new marriage between the Green of all our habitats and the Blue of all our digital technologies and how this new marriage can support and develop a better society and a healthier biosphere **Compiler**
