### Glossary

Students use the glossary to help understand these terms:

1. **Demographics** – The study of human population, how it grows, and how it changes.
2. **Demographic Trends** – Changes in population over time, such as birth and death rates.
3. **Carrying Capacity** – The maximum number of individuals an environment can support.
4. **Human Geography** – The study of how human activities and interactions are distributed across the Earth's surface.
5. **Population Density** – The number of people living in a specific area.
6. **Population Growth** – The increase in the number of people in a population over time.
7. **Population Change** – The change in the number of people in a population over time.
8. **Population Structure** – The distribution of people in a population by age, sex, and other factors.
9. **Population Policy** – Government actions to influence population growth and distribution.
10. **Population Problems** – Issues related to population growth, such as resource scarcity and environmental degradation.
11. **Population Projection** – Estimates of future population based on current trends.

### Critical Thinking

Students use each analysis to help understand the relationship between the two:

1. **Compare and contrast the relationship between the demographic trends between developed and developing countries.**

	Developed Countries	Developing Countries	Global Demographic Trends	Population Growth Rates	Population Problems
Developed	High birth rates, low death rates, stable population	High birth rates, high death rates, rapid population growth	Population growth is slowing down	Population growth is slowing down	Population growth is slowing down
Developing	High birth rates, high death rates, rapid population growth	High birth rates, high death rates, rapid population growth	Population growth is slowing down	Population growth is slowing down	Population growth is slowing down

2. **Identify the primary factors influencing the relationship between the demographic trends between developed and developing countries.**
3. **Identify the primary factors influencing the relationship between the demographic trends between developed and developing countries.**

**Biology** Sandra Alters, 2000 Designed for a one or two semester non majors course in introductory biology taught at most two and four year colleges. This course typically fulfills a general education requirement and rather than emphasizing mastery of technical topics it focuses on the understanding of biological ideas and concepts how they relate to real life and appreciating the scientific methods and thought processes. Given the authors work in and dedication to science education this text's writing style pedagogy and integrated support package are all based on classroom tested teaching strategies and learning theory. The result is a learning program that enhances the effectiveness efficiency of the teaching and learning experience in the introductory biology course like no other before it.
