Environmental Science Clark Edward Adams, Bernard J. Nebel, 2001-07 By Clark Adams Texas A M University An excellent review tool offering both concept and content review exercises **Effective Learning in the Life Sciences** David J. Adams, 2011-09-28 Effective Learning in the Life Sciences is intended to help ensure that each student achieves his or her true potential by learning how to solve problems creatively in laboratory field or other workplace setting Each chapter describes state of the art approaches to learning and teaching and will include case studies worked examples and a section that lists additional online and other resources All of the chapters are written from the perspective both of students and academics and emphasize and embrace effective scientific method throughout This title also draws on experience from a major project conducted by the Centre for Bioscience with a wide range of collaborators designed to identify and implement creative teaching in bioscience laboratories and field settings With a strong emphasis on students thinking for themselves and actively learning about their chosen subject Effective Learning in the Life Sciences provides an invaluable guide to making the university experience as effective as possible [A Primer on Environmental Sciences](#) Matthew N. O. Sadiku, Uwakwe C. Chukwu, Olaniyi D. Olaleye, 2022-02-09 In a modern society it is easy to forget that our society depends largely on the environmental processes that govern our world Environment refers to an aggregate of surroundings in which living beings such as humans animals and plants live and non living things exist It includes air water land living organisms and materials surrounding us The environment is an important part of our daily lives Environmental issues are now part of every career path and employment area Environmental science is an interdisciplinary field that applies principles from all the known technologies and sciences to study the environment and provide solutions to environmental problems It is the study of how the earth works and how we can deal with the environmental issues we face There is an ever demanding need for experts in this field because the environment is responsible for making our world beautiful and habitable For this reason environmental science is now being taught at high schools and higher institutions of learning Education on environmental science will empower the youths to take an active role in the world in which they live **Essentials of Environmental Science** Bernard J. Nebel, G. S. Dhaliwal, Pearson Custom Publishing, S. S. Kukal, 1999-11 **Environmental Science** Richard Wright, Richard T. Wright, 2005 Environmental Science Toward A Sustainable Future 9 e focuses on the question

What will it take to move our civilization toward a long term sustainable relationship with the natural world Its goal is to engage and inform students so they can critically evaluate environmental issues and make informed decisions about their environment Three main categories define how the author works to achieve this goal Critical thinking Applications Resources for instructors and students

Environmental Science Theory W.T. de Groot,1992-10-22 Having no competitive works this unique publication presents a single structure for the analysis explanation and solution of environmental problems regardless of their location nature or scale In this problem oriented approach a coherent framework interconnects the study of facts and values environmental systems social causes and ethical premises Counterbalancing current biases the author emphasizes the fundamental normative economic and social scientific aspects of truly interdisciplinary environmental science For instance the normative side of environmental problems are often neglected resulting in policy designs and evaluations containing inefficient mixtures of sophisticated models and poorly grounded normative premises this is the first major study to enrich the field with more normative consistency and groundedness It is also the first text to consistently identify the social causes of environmental problems rather than focusing on the physical scientific aspects and thus design deeper and more effective policies Furthermore a tinge of post modern thinking runs throughout the book with special care being taken however to constantly keep in view the practical relevance of theory for problem oriented work The book will be of interest to environmental scientists and managers wishing to improve the consistency and depth of their work to social scientists and geographers wishing to connect their discipline to the environmental problems field and to general scientists interested in the connections between philosophy and practice
