Rational Algebraic Curves J. Rafael Sendra, Franz Winkler, Sonia Pérez-Díaz, 2007-12-10 The central problem considered in this introduction for graduate students is the determination of rational parametrizability of an algebraic curve and in the positive case the computation of a good rational parametrization This amounts to determining the genus of a curve its complete singularity structure computing regular points of the curve in small coordinate fields and constructing linear systems of curves with prescribed intersection multiplicities The book discusses various optimality criteria for rational parametrizations of algebraic curves **Glencoe Mathematics** ,2001 **A New English Dictionary on Historical Principles** James Augustus Henry Murray, 1910 **Oxford English Dictionary** J.
