M. Selke,Donatien-Pascal Kamdem,David Shires,2014-12-22 New expanded second edition with key technical regulatory and marketing developments from the past 10 years in the packaging industryCovers the materials processes and design of virtually all paper and fiberboard packaging for end products displays storage and distributionNew information on European and global standards selection criteria for paperboard as well as emerging sustainability initiativesExplains recent tests measurements and costs with ready to use calculations Ten years ago the first edition of Cartons Crates and Corrugated Board quickly became the standard reference book for wood and paper based packaging Endorsed by TAPPI and other professional societies and used as a textbook worldwide the book has now been extensively revised and updated by a team formed by the original authors and two additional authors While preserving the critical performance and design data of the previous edition this second expanded edition offers new information on the technologies tests and regulations impacting the paper and corrugated industries worldwide with a special focus on Europe and Japan New information has been added on tests and novel designs for folded cartons as well as expanded discussions of paperboard selection for specific applications emerging barrier packaging food contact and migration and the dynamics and opportunities of corrugated in distribution systems Recent developments on recycling and sustainability are also highlighted

Food Packaging Gordon L. Robertson,2016-04-19 This book presents an integrated approach to understanding the principles underlying food packaging and their applications This edition includes new and expanded coverage of biobased packaging and bionanocomposites nanotechnology applications including nanoclays metallization and atomic layer deposition shelf life design analysis and estimation safety and legislative aspects of packaging including public interest in food contact materials such as BPA and phthalates life cycle assessment and sustainability A new chapter addresses food packaging closures and sealing systems including closures for plastic and composite containers and peelable seals **Towards Sustainable Management of the Boreal Forest** Philip Joseph Burton,2003 Presenting a summary of the development in boreal forest management this book provides a progressive vision for some of the world s northern forests It includes a

selection of chapters based on the research conducted by the Sustainable Forest Management Network across Canada It includes a number of case histories

Microhydrodynamics Sangtae Kim,Seppo J. Karrila,2013-04-26 This book is well organized and comprehensive an eloquent and enduring statement of significant hydrodynamic principles AIChE Journal Microhydrodynamics concerns the flow and related phenomena pertinent to the motion of small particles suspended in viscous fluids This text focuses on determining the motion of a particle or particles through a viscous fluid in bounded and unbounded flow Its central theme is the mobility relation between particle motion and forces Microhydrodynamics Principles and Selected Applications functions as a manual that explains methods for solving particulate flows at low Reynolds number from analytical to computational methods The ever increasing growth in computational power has resulted in a similar growth in the range of solvable problems in microhydrodynamics Suitable for graduate students in engineering and applied mathematics this text treats the mathematical foundations and highlights the interplay of both mathematical and physical insights guiding readers through single particle theory and problems related to multiparticle analyses

Encyclopedia of Forest Sciences Julian Evans,John A. Youngquist,2004-04-02 A combination of broad disciplinary coverage and scientific excellence the Encyclopedia of Forest Sciences will be an indispensable addition to the library of anyone interested in forests forestry and forest sciences Packed with valuable insights from experts all over the world this remarkable set not only summarizes recent advances in forest science techniques but also thoroughly covers the basic information vital to comprehensive understanding of the important elements of forestry The Encyclopedia of Forest Sciences also covers relevant biology and ecology different types of forestry e g tropical forestry and dryland forestry scientific names of trees and shrubs and the applied economic and social aspects of forest management Valuable key features further enhance the utility of this Encyclopedia as an exceptional reference tool Also available online via ScienceDirect featuring extensive browsing searching and internal cross referencing between articles in the work plus dynamic linking to journal articles and abstract databases making navigation flexible and easy For more information pricing options and availability visit www.info.sciencedirect.com Edited and written by a distinguished group of editors and contributors Well organized encyclopedic format provides concise readable entries easy searches and thorough cross references Illustrative tables figures and photographs in every entry produced in full color Comprehensive glossary defines new and important terms Complete up to date coverage of over 60 areas of forest sciences sure to be of interest to scientists students and professionals alike Editor in Chief is the past president of the International Union of Forestry Research Organizations the oldest international collaborative forestry research organization with over 15 000 scientists from 100 countries

Pulp and Paper Industry Pratima Bajpai,2017-02-25 Pulp and Paper Industry Emerging Waste Water Treatment Technologies is the first book which comprehensively reviews this topic Over the past decade pulp and paper companies have continued to focus on minimizing fresh water use and effluent discharges as part of their move towards sustainable operating practices Three stages basic

conservation water reuse and water recycling provide a systematic approach to water resource management Implementing these stages requires increased financial investment and better utilization of water resources The ultimate goal for pulp and paper companies is to have effluent free factories with no negative environmental impact The traditional water treatment technologies that are used in paper mills are not able to remove recalcitrant contaminants Therefore advanced water treatment technologies are being included in industrial wastewater treatment chains aiming to either improve water biodegradability or its final quality This book discusses various measures being adopted by the pulp and paper industry to reduce water consumption and treatment techniques to treat wastewater to recover it for reuse The book also examines the emerging technologies for treatment of effluents and presents examples of full scale installations Provides thorough and in depth coverage of advanced treatment technologies which will benefit the industry personnel pulp manufacturers researchers and advanced students Presents new treatment strategies to improve water reuse and fulfill the legislation in force regarding wastewater discharge Presents viable solutions for pulp and paper manufacturers in terms of wastewater treatment Presents examples of full scale installations to help motivate mill personnel to incorporate new technologies

Environmentally Benign Approaches for Pulp Bleaching Pratima Bajpai, 2012-05-30 Pulp and paper production has increased globally and will continue to increase in the near future Approximately 155 million tons of wood pulp is produced worldwide and about 260 million is projected for 2010 To cope with the increasing demand an increase in production and improved environmental performance is needed as the industry is under constant pressure to reduce environmental emissions to air and water This book gives updated information on environmentally benign approaches for pulp bleaching which can help solve the problems associated with conventional bleaching technologies Main focus is on the environmentally friendly technologies that can help solve some of the problems associated with conventional bleaching technologies Information given is up to date authoritative and cites the experiences of many mills and pertinent research which is of interest to those working in the industry or intending to do so Covers in great depth all the aspects of various bleaching processes including environmental issues *Bacterial Nanocellulose for Papermaking and Packaging* Pratima

Bajpai, 2024-12-23 *Bacterial Nanocellulose for Papermaking and Packaging* explores the groundbreaking potential of bacterial nanocellulose BNC in the papermaking and packaging industries It provides an in depth overview of BNC s unique properties biosynthesis and scalable production methods highlighting its role as a sustainable high performance biomaterial Special emphasis is placed on its applications such as enhancing paper durability fire resistance barrier properties and creating specialized paper products Key Features Comprehensive analysis of BNC s production methods from lab scale to industrial scale Insights into BNC s transformative applications in papermaking including as a reinforcing agent and coating material Exploration of BNC s potential in developing advanced packaging solutions Discussion on challenges and future perspectives for sustainable and cost effective BNC production Readership This multidisciplinary resource is ideal for

researchers biotechnologists material scientists chemical engineers and academics in biotechnology applied chemistry and environmental sciences *Biotechnology for Pulp and Paper Processing* Pratima Bajpai, 2018-02-14 The book provides the most up to date information available on various biotechnological processes useful in the pulp and paper industry The first edition was published in 2011 covering a specific biotechnological process or technique discussing the advantages limitations and prospects of the most important and popular processes used in the industry Many new developments have taken place in the last five years warranting a second edition on this topic The new edition contains about 35% new material covering topics in Laccase application in fibreboard biotechnology in forestry pectinases in papermaking stickies control with pectinase products from hemicelluloses value added products from biorefinery lignin use of enzymes in mechanical pulping

Environmentally Friendly Production of Pulp and Paper Pratima Bajpai, 2011-03-21 Implementing Cleaner Production in the pulp and paper industry The large and still growing pulp and paper industry is a capital and resource intensive industry that contributes to many environmental problems including global warming human toxicity ecotoxicity photochemical oxidation acidification nitrification and solid wastes This important reference for professionals in the pulp and paper industry details how to improve manufacturing processes that not only cut down on the emission of pollutants but also increase productivity and decrease costs Environmentally Friendly Production of Pulp and Paper guides professionals in the pulp and paper industry to implement the internationally recognized process of Cleaner Production CP It provides updated information on CP measures in Raw material storage and preparation Pulping processes Kraft Sulphite and Mechanical Bleaching recovery and papermaking Emission treatment and recycled fiber processing In addition the book includes a discussion on recent cleaner technologies and their implementation status and benefits in the pulp and paper industry Covering every aspect of pulping and papermaking essential to the subject of reducing pollution this is a must have for paper and bioprocess engineers environmental engineers and corporations in the forest products industry
