technology Most importantly she introduces a curricular model for teaching composition a model which provides an array of composition activities to try in the music classrooms and studios These activities encourage musical and creative growth through music composition while they are organized in logical units corresponding to existing teaching modules they also offer jumping off points for music teachers to exercise their own creative thinking and create music composition activities that are customized to their classes and needs As a whole *Music Outside the Lines* both successfully reasons that music composition should be at the core of school music curriculum and also provides inservice and pre service educators with an essential resource and compendium of practical tips and plans for fulfilling this goal **The Strad** ,1896 *Integrating Music Across the Elementary Curriculum* Kristin Harney,2020 This book is designed to support K 5 classroom teachers as they integrate music throughout the elementary curriculum It contains detailed practical ideas and examples including full lesson plans and over 100 teaching ideas and strategies for integrating music with visual art language arts social studies science and mathematics Following an overview of the interdisciplinary approach the remaining chapters explore connections between music and other areas of the elementary curriculum Each chapter also includes a section addressing national standards with tables showing the specific standards that are included in each lesson and activity This text utilizes the most recent National Core Arts Standards 2015 as well as the most recent standards in mathematics science social studies and language arts All the lessons in this book are designed to be fully taught by classroom teachers the content is accessible to those who lack formal music training yet is solidly rooted in research and best practices While classroom teachers can teach these lessons on their own this book may facilitate partnerships and collaboration between classroom teachers and music specialists All the lessons and activities included in this text have been reviewed by practicing teachers and most have been field tested in elementary classrooms Throughout the book there is an emphasis on interdisciplinary lessons that demonstrate valid connections between disciplines while maintaining the integrity of each discipline involved including a teacher tested model that allows teachers to successfully create their own interdisciplinary lessons *Samuel Barber* Barbara B.
