Resources in Education, 2000 [Meeting the Challenges to Measurement in an Era of Accountability](#) Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www>

Taking Measure of Charter Schools Julian R. Betts, Paul T. Hill, 2010-05-16 Charter schools offer something that public school systems parents and teachers need a way to experiment with alternative ways of teaching motivating students organizing schools using technology and employing teachers While people came down on both sides of support for or against charter schools everyone was surprised by how difficult it was to assess charter school performance The first part of this book focuses on how to improve estimates of charter schools performance especially their benefits to students who attend them the second part suggests how policymakers can learn more about charter schools and make better use of evidence The editors and authors suggest ways states and localities can improve the quality of data on which charter school studies are based and trace some of the ways charter school research influences policy

Profile of 1994-95 State Assessment Systems and Reported Results, *The Role of End-of-course Exams and Minimum Competency Exams in Standard-based Reforms* John Bishop, 2000

Cornerstones of Strong Schools Jeffrey Zoul, 2013-10-02 This book describes the practices of principals who develop and maintain purposeful learning communities It applies and extends nine of the leadership responsibilities identified in research conducted by Marzano Waters and McNulty in *School Leadership That Works*

Educational Measurement Robert L. Brennan, 2023-10-03 Educational Measurement has been the bible in its field since the first edition was published by ACE in 1951 The importance of this fourth edition of Educational Measurement is to extensively update and extend the topics treated in the previous three editions As such the fourth edition documents progress in the field and provides critical guidance to the efforts of new generations of researchers and practitioners Edited by Robert Brennan and jointly sponsored by the American Council on Education ACE and the National Council on Measurement in Education the fourth edition provides in depth treatments of critical measurement topics and the chapter authors are acknowledged experts in their respective fields Educational measurement researchers and practitioners will find this text essential and those interested in statistics psychology business and economics should also find this work to be of very strong interest Topics covered are divided into three subject areas theory and general principles construction administration and scoring and applications The first part of the book covers the topics of validation reliability item response theory scaling and norming linking and equating test fairness and cognitive psychology Part two includes chapters on test development test administration performance assessment setting performance standards and technology in testing The final section includes chapters on second language testing testing for accountability in K 12 schools standardized assessment of individual achievement in K 12 schools higher education admissions testing monitoring educational progress licensure and certification testing and legal and ethical issues
