International Handbook of Historical Archaeology Teresita Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially

commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today **The Oxford Handbook of Maritime Archaeology** Alexis Catsambis,Ben Ford,Donny L.

Hamilton,2011-04-01 The Oxford Handbook of Maritime Archaeology is a comprehensive survey of the field as seen through the eyes of nearly fifty scholars at a time when maritime archaeology has established itself as a mature branch of archaeology This volume draws on many of the distinct and universal aspects of maritime archaeology bringing them together under four main themes the research process ships and shipwrecks maritime and nautical culture and issues of preservation and management The first section of the book deals with the best practices for locating documenting excavating and analyzing submerged sites This methodological foundation is followed by a sample of shipwreck studies from around the world as scholars trace the regional development of ships and seafaring Chosen to balance the traditional core regions of maritime archaeology with important but lesser studied areas it aims at offering an international account of the study of submerged sites Reflecting the growing number of scholars who study past maritime cultures but not shipwrecks the third section of the book addresses various aspects of the maritime landscape and ethnography above and below the water The final chapters then approach maritime archaeology in a broader context moving beyond archaeological sites to discuss the archaeological record in general within legal preservation and management frameworks Taken together these individual and original articles provide a valuable resource that summarizes the current state of the field of maritime archaeology and offers insight into the future of this established and growing discipline **International Law of Underwater Cultural Heritage**

Kim Browne,Murray Raff,2023-01-01 This book brings together three distinct areas of International Law namely Environmental Heritage and Ocean Law to address the international legal protection of historically significant wrecks with particular focus on the environmental hazards they may pose The confluence of Heritage Law and the Law of the Sea with International Environmental Law represents an important development in international governance strategies for the twenty first century in particular those legal and administrative regimes that concern the world s oceans and underwater cultural heritage protection Importantly connections between international legal regimes such as the 1982 Law of the Sea and institutions like the International Maritime Organisation IMO and United Nations Education Scientific Cultural Organisation UNESCO can play a crucial part in governance strategies that involve the regulation of marine pollution and historic shipwrecks *The Routledge Handbook of Global Historical Archaeology* Charles E. current state of research and collectively outlining future directions for the field The broad range of topics covered in this volume allows for specificity within individual chapters while building to a cumulative overview of the field of historical archaeology as it stands and where it could go next Archaeological research is discussed in the context of current sociological concerns different approaches and techniques are assessed and potential advances are posited This is a comprehensive treatment of the sub discipline engaging key contemporary debates and providing a series of specially commissioned geographical overviews to complement the more theoretical explorations This book is designed to offer a starting point for students who may wish to pursue particular topics in more depth as well as for non archaeologists who have an interest in historical archaeology Archaeologists historians preservationists and all scholars interested in the role historical archaeology plays in illuminating daily life during the past five centuries will find this volume engaging and enlightening
