Secure Services Gateway 5

Juniper NETWORKS
Getting Started

Use the instructions in this guide to help you connect your Secure Services Gateway (SSG) 5 device to your network. For additional configuration information, see the SSG 5 Hardware Installation and Configuration Guide. (This guide uses a version of the SSG 5-WLAN device to illustrate basic network connectivity.)

CONNECTING THE DEVICE

Use the network diagram above and the instructions below to connect and set up the SSG 5 device to protect your network. Use the LEDs on the front panel of the device to help you determine its status.

Step 1

Connect the workstation to the device using either of the following methods:

- Connect an Ethernet cable from one of the Trusted ports labeled 0/2 — 0/6 to the Ethernet port on the workstation. [We recommend this connection method.]
- Connect an Ethernet cable from the console port to an RJ-45-to-DB-9 adapter which then connects to the serial port on the workstation. [RJ-45-to-DB-9 adapters can be purchased from Juniper Networks. Refer to the SSG 5 Hardware Installation and Configuration Guide for RJ-45-to-DB-9 adapter pin numbering information]

Step 2

Connect the device to a power source using the supplied power cable. [We recommend using a surge protector.] Confirm that the following LEDs are working correctly:

a. Ensure that the POWER LED glows green. This indicates that the device is receiving power.

b. After the device starts (about 2 minutes), ensure that the STATUS LED blinks green. This indicates that the device is operating normally.

c. Ensure that the Link Activity LEDs glow green for the connected Ethernet ports. This indicates that the device has network connectivity.

Step 3

Configure the workstation to access the device through a browser:

a. Ensure that the workstation is properly connected to the device using one of the methods presented in step 1.

b. Change the TCP/IP settings of the workstation to automatically obtain its IP address from the device using DHCP. For help, see the operating system documentation for the workstation.

Note: Ensure that your internal network does not already have a DHCP server.

c. If necessary, restart the workstation to enable the changes to take effect.

You can use the Initial Configuration Wizard (ICW) to configure the SSG 5 device. Before starting the ICW, decide how you want to deploy your device. [For additional information, see the SSG 5 Hardware Installation and Configuration Guide.]
