Environmental Chemistry Practical Manual:

A Laboratory Manual for Environmental Chemistry R. Gopalan, R. Wilfred Sugumar, 2013-12-30 The present book is meant for the students who opt for a course in Environmental Chemistry with laboratory work as a component of the course. Spread in 72 experiments the analyses of soil water and air have been described in a simple manner so that most of these experiments can be conducted even by the beginners in this subject. The principles involved in the preparation of the reagents and the procedures are described for each experimental method. The authors hope that this manual would prove to be useful in laboratories where soil water and air are routinely tested.

Experiments in Environmental Chemistry P. D. Vowles, D. W. Connell, 1980-01-01

Green Chemistry Laboratory Manual for General Chemistry Sally A. Henrie, 2015-03-18

Green chemistry involves designing novel ways to create and synthesize products and implement processes that will eliminate or greatly reduce negative environmental impacts. Providing educational laboratory materials that challenge students with the customary topics found in a general chemistry laboratory manual, this lab manual enables students to see how green chemistry principles can be applied to real world issues. Following a consistent format, each lab experiment includes objectives, prelab questions, and detailed step by step procedures for performing the experiments. Additional questions encourage further research about how green chemistry principles compare with traditional more hazardous experimental methods.
