Asia encompasses a vast reach from Pakistan and India to Japan, the Philippines and Indonesia and in this book including Australia. The Handbook of Aging provides a framework for making sense of the meeting between reverential views of the elderly and contemporary priorities as Asia arrives at the crossroads. The need for innovative approaches to social policy and personal practices is nowhere more evident than in Asian countries where modern marketing economies have forced hard political choices. The economic tigers of the Asian Pacific region experienced the aging of their populations ahead of other Asian countries but solutions reached during times of financial boom are being re

examined as economies come back to earth with soft or hard landings The Handbook of Asian Aging provides an atlas of the far reaching changes that are afoot and that will become even more pronounced in the near future **WHO operational**
