**Art + DIY Electronics** Garnet Hertz, 2023-05-30 A systematic theory of DIY electronic culture drawn from a century of artists who have independently built creative technologies Since the rise of Arduino and 3D printing in the mid 2000s do it yourself approaches to the creative exploration of technology have surged in popularity But the maker movement is not new it is a historically significant practice in contemporary art and design This book documents tracks and identifies a hundred years of innovative DIY technology practices illustrating how the maker movement is a continuation of a long standing creative electronic subculture Through this comprehensive exploration Garnet Hertz develops a theory and language of creative DIY electronics drawing from diverse examples of contemporary art including work from renowned electronic artists such as Nam June Paik and such art collectives as Survival Research Laboratories and the Barbie Liberation Front Hertz uncovers the defining elements of electronic DIY culture which often works with limited resources to bring new life to obsolete objects while engaging in a critical dialogue with consumer capitalism Whether hacking blackboxed technologies or deploying culture jamming techniques to critique commercial labor practices or gender norms the artists have found creative ways to make personal and political statements through creative technologies The wide range of innovative works and practices profiled in Art DIY Electronics form a general framework for DIY culture and help inspire readers to get creative with their own adaptations fabrications and reimaginings of everyday technologies

**Musical Listening in the Age of Technological Reproduction** Gianmario Borio, 2016-04-29 It is undeniable that technology has made a tangible impact on the nature of musical listening The new media have changed our relationship with music in a myriad of ways not least because the experience of listening can now be prolonged at will and repeated at any time and in any space Moreover among the more striking social phenomena ushered in by the technological revolution one cannot fail to mention music s current status as a commodity and popular music s unprecedented global reach In response to these new social and perceptual conditions the act of listening has diversified into a wide range of patterns of behaviour which seem to resist any attempt at unification Concentrated listening the form of musical reception fostered by Western art music now appears to be but one of the many ways in which audiences respond to organized sound Cinema for example has developed specific ways of combining images and sounds and more recently digital technology has redefined the standard forms of mass communication Information is aestheticized and music in turn is incorporated into pre existing symbolic fields This volume the first in the series Musical Cultures of the Twentieth Century offers a wide ranging exploration of the relations between

sound technology and listening practices considered from the complementary perspectives of art music and popular music music theatre and multimedia composition and performance ethnographic and anthropological research Fan Identities and Practices in Context Mark Duffett, 2017-10-02 Popular music is not simply a series of musicians moments genres or recordings Audiences matter and the most ardent audience members are the fans To be a fan is to feel a connection with music The study of fandom has begun to emerge as a vital strand of academic research one that offers a fresh perspective on the nature of music culture Dedicated to Music investigates fan identities and practices in different contexts and in relation to different bands and artists Through a series of empirical case studies the book reflects a diverse array of objects and perspectives associated with this vibrant new field of study Contributors examine how fans negotiate their identities and actively pursue their particular interests touching on a range of issues including cultural capital generational memory gender fan fiction and the use of new media This book was originally published as two special issues of Popular Music and Society

Between Air and Electricity Cathy van Eck, 2017-02-09 Composers and sound artists have explored for decades how to transform microphones and loudspeakers from inaudible technology into genuinely new musical instruments While the sound reproduction industry had claimed perfect high fidelity already at the beginning of the twentieth century these artists found surprising ways of use for instance tweaking microphones swinging loudspeakers furiously around ditching microphones in all kinds of vessels or strapping loudspeakers to body parts of the audience Between air and electricity traces their quest and sets forward a new theoretical framework providing historic background on technological and artistic development and diagrams of concert and performance set ups From popular noise musician Merzbow to minimalist classic Alvin Lucier cult instrument inventor Hugh Davies or contemporary visual artist Lynn Pook they all aimed to make audible what was supposed to remain silent

**Deleuze and Design** Betti Marenko, 2015-06-08 Drawing on a range of contributors case studies and examples this book examines how we can think about design through Deleuze and how Deleuze s thought can be re designed to produce new concepts It taps into the emerging networks between philosophy as an act of inventing concepts and design as the process of inventing the world

**Half Sound, Half Philosophy** Jing Wang, 2021-01-14 From the late 1990s until today China s sound practice has been developing in an increasingly globalized socio political aesthetic milieu receiving attentions and investments from the art world music industry and cultural institutes with nevertheless its unique acoustic philosophy remaining silent This book traces the history of sound practice from contemporary Chinese visual art back in the 1980s to electronic music which was introduced as a target of critique in the 1950s to electronic instrument building fever in the late 1970s and early 1980s and to the origins of both academic and nonacademic electronic and experimental music activities

This expansive tracing of sound in the arts resonates with another goal of this book to understand sound and its artistic practice through notions informed by Chinese qi cosmology and qi philosophy including notions of resonance shanshui mountains waters huanghu elusiveness and evasiveness and distributed monumentality and anti monumentality By turning back to deep history to learn about the meaning and function of sound and listening in ancient China the book offers a refreshing understanding of the British sinologist Joseph Needham's statement that Chinese acoustics is acoustics of qi and expands existing conceptualization of sound art and contemporary music at large

**Sonic Writing** Thor Magnusson, 2019-02-21 Sonic Writing explores how contemporary music technologies trace their ancestry to previous forms of instruments and media Studying the domains of instrument design musical notation and sound recording under the rubrics of material symbolic and signal inscriptions of sound the book describes how these historical techniques of sonic writing are implemented in new digital music technologies With a scope ranging from ancient Greek music theory medieval notation early modern scientific instrumentation to contemporary multimedia and artificial intelligence it provides a theoretical grounding for further study and development of technologies of musical expression The book draws a bespoke affinity and similarity between current musical practices and those from before the advent of notation and recording stressing the importance of instrument design in the study of new music and projecting how new computational technologies including machine learning will transform our musical practices Sonic Writing offers a richly illustrated study of contemporary musical media where interactivity artificial intelligence and networked devices disclose new possibilities for musical expression Thor Magnusson provides a conceptual framework for the creation and analysis of this new musical work arguing that contemporary sonic writing becomes a new form of material and symbolic design one that is bound to be ephemeral a system of fluid objects where technologies are continually redesigned in a fast cycle of innovation

**The Music of Sounds and the Music of Things** Leigh Landy, John Richards, 2024-09-30 This book investigates two areas in which the appreciation of sonic creativity can be easily acquired across diverse cultures ages and interests the music of sounds making music with any sounds part of today's sampling culture and the music of things and the creation of instruments using existent materials another type of sampling involving the notion of instrument as composition as part of today's DIY or DIT do it together culture The book offers broad discussions regarding the music of things written by John Richards followed by the music of sounds written by Leigh Landy These chapters are followed by a focus on the workshop demonstrating the collaborative and inclusive potential in both areas and a spotlight on eight artists with a broad diversity of backgrounds and approaches to sound and music who discuss their perceptions The book's conclusion focuses on similarities and differences between the music of sounds and the music of things suggesting finally that both might form part of the 21st century's folk music landscape The book is primarily aimed towards students interested in current forms of sonic creativity but will be of interest to those interested in broader issues of sampling culture hacking and sound studies
