OVERTRADING!!!**

The background image shows a person with blonde hair, seen from the side, looking at two computer monitors. The monitor on the left displays a financial data table with columns for 'High', 'Low', 'Open', and 'Close'. It lists various market indices including NY, FRA, and CAFE. The monitor on the right displays a line chart with multiple colored lines (blue, green, red) representing different data series over time. The text 'NO MORE OVERTRADING!!!' is overlaid in large, bold, white capital letters across the center of the image.

How to Avoid Fear and Greed as a Trading Beginner Zordi Cobre, Trading is challenging for most people because they simply don't have the right information, tools, or confidence to become successful. *How to Avoid Fear and Greed as a Trading Beginner* is important for beginners because it tells it like it is and gives an inside look at trading the financial markets, giving you the reality on what the live market is really like, the way they are really run, and tells you who runs them and what you need to do as a self-directed beginner to survive in them and avoid the fear and greed that is so prevalent in the financial market trading business. Let's face it: it's a well-known fact that 97% of brand-new self-directed investors and traders fail and lose all of their money. Why does this happen? It happens because brand-new self-directed traders enter into this business with a bunch of misguided, grandiose ideas of making a million dollars from trading, and while you can surely make millions of dollars from trading, you would need to be using hundreds of millions of dollars of capital to do so. No joke. As a brand-new self-directed trader, you have no idea of the brutality and volatility that goes on in the

live markets on a daily basis and that there are people in the live markets who will walk over dead bodies to get paid so make no mistake as a beginner and think you can go in the live market and beat them you can't. What you can do though is properly prepare yourself to trade with the best traders in the world and get paid right along with them instead of paying them. Once you have completed reading this entire book you will have a chance at competing with the best professional traders on the planet. The information in *How to Avoid Fear and Greed as a Trading Beginner* will put you on the fast track to being able to make an unlimited income for yourself and becoming consistently profitable enough from trading the financial markets to perhaps even making a living from doing it. Isn't that the type of business you would like to be in?

The 10XROI Trading System LR Thomas, 2024-06-01

If you are fed up with trading systems that promise the earth and fail to deliver then The 10XROI Trading System will not disappoint. A leading foreign exchange broker conducted a study that found that winning traders had something in common. Their wins were much larger than their losses. Many trading systems are designed to have lots of wins but that doesn't make them profitable; they just appeal to the Holy Grail seeker who is looking for a trading system that never loses. By trading high probability trading strategies that give a very large risk reward ratio like The 10XROI Trading system you will automatically have a much higher chance of actually making a profit in the Forex markets. You may be an experienced trader who has already taken many trading courses or you may be just trying to decide on the best trading system for your personality and life circumstances. Written by a trader with over eight years of experience in trading foreign currencies, gold, and futures, this book is written in an easy-to-comprehend style with lots of illustrations and trading examples to help clarify each part of the system. This trading strategy is simple and easy to follow and takes up a very small amount of time as it uses the daily and hourly time frames. Unlike most day trading systems, this makes it easy to trade around most jobs. Most importantly, it explains every part of the system, including the correct trading psychology and money management, which most systems leave out.

Recent Review: Ever heard the expression buy low, sell high? Or how about let your winners run and cut your losses? I especially like to ensure your winners exceed your losses. I just finished reading a book on the Quants whose mantra is to put the maths on your side. Oh, and I love the Jesse Livermore quote: "It never was my thinking that made the big money for me. It always was my sitting." Great Sayings, Wonderful sayings, Fantastic. But my thinking: most retail strategies do not capture most if any of these principles. So is there a methodology that retail traders can use even with limited funds that captures all of this? And I mean all of this. I believe there is. LR has put together a strategy that does as the big boys do: focusses not on consistency of trades but consistency of the trader using a simple intuitive market rhythmic approach. Of the strategy: Does it Buy low, Sell High? Yes. Are Winners run, Losses cut? Yes. Do Winners exceed Losers? Yes. Is the Maths on your side? Yes. Do you Wait for trades to come to you? Yes. I have been trading the 10XROI strategy for just over a month now. The last two weeks of trading has seen me bag over 1000 pips. And yet that is not I repeat NOT the focus or what impresses me. It is the rate of return. Each trade aims for a take profit of 10R and always a stop loss of 1R which I have

achieved While it s still early days for me I already know the principles taught are the principles practiced and espoused by the world s foremost traders There is no magic bullet Just sound time tested principles focussed on patience a simple strategy money management and sound psychology Why reinvent the wheel Just spin that thing Kevin Trading Psychology Collection LR Thomas,2024-06-01 If You Want to Be Successful in Trading You Need to Buy This Book In these four best selling trading psychology books you will find practical immediately usable strategies to improve the way you trade Control Your Inner Trader Self control is probably the most important skill you need to acquire as a trader Unfortunately most trading psychology books can be very vague and short on specific strategies to take control of your mental state while trading Trading psychology shares equal importance with money management and the trading system and yet most traders remain unaware of the importance of taking into account their trading psychology when designing a trading system What traders need is an unambiguous trader psychology system that can easily slot into whatever system they are trading and enable them to trade their system according to their trading plan Control Your Inner Trader draws on the experience of an eight year trading veteran who is also a qualified therapist Behavioral and therapeutic techniques are included in the book that is easy for anyone to follow Overcome Your Fear in Trading The most prevalent emotion facing traders is fear Fear causes traders to exit trades too early ruining their equity curve Fear causes traders to self sabotage so they can fulfill their self fulfilling prophecy of trading failure Fear causes traders to find reasons to avoid taking trades that would have been winners Fear causes traders to exit trades before they have a chance to get the move underway and then have the misery of seeing a profitable trade run away from them There are many more destructive aspects to fear in trading and what is vital for the trader in order for them to succeed is to have a way of thinking about trading that eliminates fear from the trading process How to Stop Over Trading is the latest book in the trading psychology series of books by L R Thomas This book zeroes in on the specific reasons traders take trades outside their trading plan and offers simple solutions to stop over trading forever The truth is that if a trader consistently trades outside their strategy even on a demo platform they are very unlikely to succeed in trading If you are skewing your trading results by taking trades that you shouldn t then this book could change your trading for the better forever Patience Lack of patience also causes negative behaviors related to trading such as not bothering to back test the system not keeping careful records and not doing an end of day or end of week analysis of trading results to find areas of improvement The feeling of things not moving fast enough also causes traders to add too many trading systems to an already overloaded brain and not be able to focus properly on any one strategy to make it profitable The profitability of the trading system is profoundly impacted by these types of behaviors and turns what is a money making system in theory into a loss making system in the real life Buy the Trading Psychology Collection and Begin Improving Your Trading Today *Control Your Inner Trader* LR Thomas,2024-03-10 Why Should You Buy This Book Self control is probably the most important skill you need to acquire as a trader Unfortunately most trading psychology books can

be very vague and short on specific strategies to take control of your mental state while trading Trading psychology shares equal importance with money management and the trading system yet most traders remain unaware of the importance of considering their trading psychology when designing a trading system What traders need is an unambiguous trader psychology system that can easily slot into whatever system they are trading and enable them to trade their system according to their trading plan Control Your Inner Trader draws on the experience of an eight year trading veteran who is also a qualified therapist Behavioral and therapeutic techniques are included in the book that are easy for anyone to follow Reader Reviews QCD Well worth the time and money Ms Thomas makes some analogies in her books that I have NEVER read in other trading psychology books Excellent Well worth the money This book combined with Overcome Your Fear in Trading are most excellent Made me want to look into some of her other works I was not disappointed Alan 5 0 out of 5 stars A refreshing new angle on how to improve trading results Few trader psychology books deliver on sufficient tools This book is surprisingly different Despite being short compared to other well known top trader books as Trading in the Zone by Mark Douglas and Trading for a Living by Alexander Elder I must say that Control Your Inner Trader is definitely among the better ones Any trader who believe that he or she can improve despite even good results will find this book have a refreshing new angle on how one can improve behavior and become a much better trader This book is time well spent Patrick Higdon Great Book Useful quick and to the point Useful quick and to the point I highly recommend this book to anyone experiencing trading frustrations Many times the first thing we question is our system or methodology when the greatest obstacle to success is ourselves our Inner Trader This book is worth a read of you re just starting out or have been trading for a long time Alastair Forbes Very helpful book indeed in a difficult subject area For a short book I found more practical solutions for erroneous mental habits whilst trading than you might ever imagine This is for me the most difficult area of trading and the author LR Thomas has got right the nub of issues with no fluff or filler I am adopting parts of this book as my mantra
