Power Farming in Australia and New Zealand Technical Manual, 1982 **Actualized Leadership** William L. Sparks, 2019-06-15 What drives the world's most effective leaders? The desire to reach their fullest potential. Actualized Leadership is the first research-based guide to applying Maslow's theory of self-actualization to leadership development. Drawing on the foundational work of Maslow, Jung, McClelland, and Frankl, Dr. William Sparks identifies nine traits that define actualized leaders and offers practical strategies to cultivate them. Readers will explore how high-performing leaders think, feel, and behave differently and how these patterns contribute to both personal fulfillment and organizational success. Rich in insight and grounded in science, this book is essential reading for leaders ready to deepen their impact by unlocking their inner potential.

Origins of Religion, Cognition and Culture Armin W. Geertz, 2014-09-11 Attempts to understand the origins of humanity have raised fundamental questions about the complex relationship between cognition and culture. Central to the debates on origins is the role of religion, religious ritual, and religious experience. What came first: individual religious ecstatic experiences, collective observances of transition situations, fear of death, ritual competence, magical coercion, mirror neurons, or temporal lobe religiosity? Cognitive scientists are now providing us with important insights on phylogenetic and ontogenetic processes. Together with insights from the humanities and social sciences on the origins, development, and maintenance of complex semiotic, social, and cultural systems, a general picture of what is particularly human about humans could emerge. Reflections on the preconditions for symbolic and linguistic competence and practice are now within our grasp. *Origins of Religion, Cognition and Culture* puts culture centre stage in the cognitive science of religion.
