Kazeroony, Guy

Ellis, 2013-06-19 Crises and scandals in the world of international management have brought a new spotlight onto how the subject is taught, studied and understood. There has been a plethora of literature on international management, but a lack of focus on how international management education (IME) can be shaped to respond to existing and future global business challenges. The Routledge Companion to International Management Education gathers together contributors from academia, industry and university administration involved in IME to introduce the domain of IME, describe the emerging state in new geographical areas, discuss the major issues and debates revolving around IME, explore the linkage of technology and international management and shed light on the future of IME. The diverse background of the contributors provides a global perspective that challenges the dominant Anglo American view with up to date specific insights originating from their indigenous viewpoints which has often been neglected and inadequately covered. The volume answers important questions such as: Do we need a vision in IME? What is the current state of IME? How has IME grown in emerging market segments? What roles does technology play in its recent development? The volume provides thought provoking reading for educators, administrators, policy makers, human resources professionals and researchers. It will also give future international management students a glimpse of IME from a global inside out perspective. [A Global View on Intercultural Management](#)

Jürgen Rothlauf, 2014-12-11 Whatever their industry of origin, all companies are facing the same challenge to a greater or lesser degree: globalization. It is becoming more and more evident that companies need to plan ahead and anticipate coming developments if they are to be successful in the future. Today it is crucial to establish a solid competitive position in the global arena. There is no doubt that a corporate culture that is open to innovation and shaped by global thinking plays a key role in this context. A culture in which representatives of different countries and cultures can come together, anticipating and understanding the cultural challenges, creates the foundation of any international business. A global view on intercultural management will be the key to successfully doing business in diverse cultural environments.
