Schlechtendahl, 2013-11-11 Principal authors U Kroszynski B Palstr9Sm 1 1 The evolution of concepts and specifications for CAD data exchange The CAD CAM community has witnessed during the last decade the appearance of several specifications as well as proposals for standards which either attempt to cover wider areas or to be more reliable and stable than the others With the rapid evolution of both hardware and software the capabilities offered by CAD systems and CAD based application systems are far more advanced than they were only ten years ago even when they are now based on micro computers or personal computers The situation with standards however is not and cannot be so In order to be reliable and accepted by a wide community of both vendors and users a standard has to be stable This implies a life span of at least a decade This also implies that the standard has to be general and flexible enough to accommodate present as well as expected future developments 1 1 1 IGES The initial development of concepts for CAD data exchange is strongly influenced by the US Integrated Computer Aided Manufacturing ICAM programme that dealt with the development of methods for data exchange In September 1979 a subgroup was established with participation of the National Bureau of Standards the General Electric Company and the Boeing Company The result of this effort was the Initial Graphics Exchange Specification IGES that was published as a NBS report 61 in 1980

Natural Language Processing: The PLNLP Approach Karen Jensen, George E. Heidorn, Stephen D. Richardson, 2012-12-06 Natural language is easy for people and hard for machines For two generations the tantalizing goal has been to get computers to handle human languages in ways that will be compelling and useful to people Obstacles are many and legendary Natural Language Processing The PLNLP Approach describes one group's decade of research in pursuit of that goal A very broad coverage NLP system including a programming language PLNLP development tools and analysis and synthesis components was developed and incorporated into a variety of well known practical applications ranging from text critiquing CRITIQUE to machine translation e.g. SHALT This book represents the first published collection of papers describing the system and how it has been used Twenty six authors from nine countries contributed to this volume Natural language analysis in the PLNLP approach is done in six stages that move smoothly from syntax through semantics into discourse The initial syntactic sketch is provided by an Augmented Phrase Structure Grammar APSG that uses exclusively binary rules and aims to produce some reasonable analysis for any input string Its approximate analysis passes to the reassignment component which takes the default syntactic attachments and adjusts them using semantic information obtained by parsing definitions and example sentences from machine readable dictionaries This technique is an example of one facet of the PLNLP approach the use of natural language itself as a knowledge representation language an innovation that permits a wide variety of online text materials to be exploited as sources of semantic information The next stage computes the intrasentential argument structure and resolves all references both NP and VP anaphora that can be treated at this point in the processing Subsequently additional components currently not so well developed as the earlier ones handle the further disambiguation of word senses the normalization of paraphrases and the construction of a paragraph

discourse model by joining sentential semantic graphs Natural Language Processing The PLNLP Approach acquaints the reader with the theory and application of a working real world domain free NLP system and attempts to bridge the gap between computational and theoretical models of linguistic structure It provides a valuable resource for students teachers and researchers in the areas of computational linguistics natural processing artificial intelligence and information science

Information Control Problems in Manufacturing Technology 1989 E.A. Puente,L. Nemes,2014-06-28 The Symposium presented and discussed the latest research on new theories and advanced applications of automatic systems which are developed for manufacturing technology or are applicable to advanced manufacturing systems The topics included computer integrated manufacturing simulation and the increasingly important areas of artificial intelligence and expert systems and applied them to the broad spectrum of problems that the modern manufacturing engineer is likely to encounter in the design and application of increasingly complex automatic systems ESPRIT Success Stories for the Information Society ,1997

Integrated Computer-Aided Design of Mechanical Systems Shaker A. Meguid,2012-12-06 In this book the author has presented an introduction to the practical application of some of the essential technical topics related to computer aided engineering CAE These topics include interactive computer graphics ICG computer aided design CAD computer and computer integrated manufacturing CIM aided analysis CAA Unlike the few texts available the present work attempts to bring all these seemingly specialised topics together and to demonstrate their integration in the design process through practical applications to real engineering problems and case studies This book is the result of the author s research and teaching activities for several years of postgraduate and undergraduate courses in mechanical design of rotating machinery computer aided engineering of finite elements solid mechanics engineering practical applications and properties of materials at Cranfield Institute of dynamics Technology Oxford Engineering Science and the University of Manchester Institute of Science and Technology UMIST It was soon realised that no books on the most powerful and versatile tools available to engineering designers existed To satisfy this developing need this book on the use of computers to aid the design process and to integrate design analysis and manufacture was prepared **Euroabstracts** ,1994 CAD Geometry Data Exchange Using STEP Helmut J. Helpenstein,2012-12-06 The Product Data Technology Advisory Group short PDTAG was established on 30 September 1992 under the auspices of the ESPRIT CIME Division of the Directorate General XIII of the European Commission Its goals include promoting European cooperation and improving the European infrastructure in Product Data Technology particularly in connection with the new standard STEP ISO 10303 The dissemination of information on Product Data Technology and on European contributions to STEP is of crucial importance to this development The current volume is the first title in a new PDTAG subseries to Springer Publishers Research Reports ESPRIT This new subseries intends to form a comprehensive repository of publications on Product Data Technology resulting from ESPRIT Projects and from European contributions to standardisation based on ISO STEP PDTAG welcomes the opportunity to make this information more

accessible under the format of a coherent subseries within the established framework of Research Reports ESPRIT Much valuable background on the new international PDT standard can thus be found in the same collection **Advances in Computer Graphics III** Maurice M. de Ruiter,1988-04-29 The material in this book was presented in the tutorial programme of the Eurographics 87 Conference held in Amsterdam The Netherlands 1987 The book contains eight contributions from leading experts in each field Major aspects of computer graphics fundamentals interactive techniques and three dimensional modelling techniques are discussed and a state of the art survey on the increasingly important area of desktop publishing is given The theory of fractals is covered by presenting a thorough treatment of their mathematics and programming Furthermore overviews of several topics such as the theory and methods of modelling three dimensional shapes and objects the fundamental concepts and current advances in user interface management systems and existing CAD interface specifications are included The book will be of interest to systems designers application programmers and researchers who wish to gain a deeper knowledge of the state of the art in the areas covered *Information Technology Atlas - Europe* International Organisations Services,1990 **Specification of a CAD*I Neutral File for Solids** E.G.
