The Mind's Interaction with the Laws of Physics and Cosmology Jeffrey S Keen, 2019-01-14

This ground breaking book is about the emerging academic and practical study of subtle energies which historically have not been easy to detect The unique experiments numerous measurements and resulting data presented here have been collected over 30 years of research The findings have resulted from pioneering discoveries leading to equations graphs universal constants formulae and laws of nature that eventually connect to cosmology and the structure of the universe The book proves with high scientific and mathematical precision that consciousness involves more than just the brain but actually depends on the very fabric of the universe Some of the discoveries prove that certain information can be communicated across the solar system not only faster than light but instantaneously The book deals with the entanglement of large objects and the fact that the cosmos possesses a universal consciousness Also shown is that the mind can detect information from the outer planets and identifies connections to a five dimensional universe and the mysterious recently discovered dark energy This text will be of interest to the considerable number of people worldwide involved in similar studies These include researchers at universities and colleges currently or wishing to teach and develop this up and coming subject non professionals and members of relevant academic societies
