Minimum Contract

Justice Lyn K L Tjon Soei Len,2017-05-04 The collapse of the Rana Plaza in Bangladesh 2013 is one of many cases to invoke critical scrutiny and moral outrage regarding the conditions under which consumer goods sold on our markets are produced elsewhere In spite of abiding moral concerns these goods remain popular and consumers continue to buy them Such transactions for goods made under deplorable production conditions are usually presumed to count as normal market transactions ie transactions that are recognized as valid consumer contracts under the rules of contract law Minimum Contract Justice challenges this presumption of normality It explores the question of how theories of justice bear on such consumer contracts how should a society treat a transaction for a good made under deplorable conditions elsewhere This Book defends the position that a society that strives to be minimally just should not lend its power to enforce support or encourage transactions that are incompatible with the ability of others elsewhere to live decent human lives As such the book introduces a new perspective on the legal debate concerning deplorable production conditions that has settled around ideas of corporate responsibility and the pursuit of international labour rights

The

Oxford Handbook of Organized Crime Letizia Paoli,2014 This handbook explores organized crime which it divides into two main concepts and types the first is a set of stable organizations illegal per se or whose members systematically engage in crime and the second is a set of serious criminal activities that are typically carried out for monetary gain

Education, Professionalism and the Quest for Accountability

Jane Green,2011-05-20 Today workers based in institutions designed to serve the public teachers nurses social workers community officers librarians civil servants etc are expected to reorganize their thoughts and practice in accordance with a performance management model of accountability which encourages a rigid bureaucracy one which translates regulation and monitoring procedures into inflexible and obligatory compliance This book shows how and why this performance model may be expected paradoxically to make practices less accountable and in the case of education less educative

Economic Efficiency Ben Van Rompuy,2012-08-01 Over the past decade we have

witnessed an apparent convergence of views among competition agency officials in the European Union and the United States on the appropriate goals of competition law enforcement Antitrust policy it is now suggested should focus on enhancing economic efficiency which we are to believe will promote consumer welfare Recent EU Commission Guidelines on the application of Article 101 TFEU appear to banish considerations that cannot be construed as having an economic efficiency value such as the environment cultural policy employment public health and consumer protection from the application of Article 101 TFEU Arguing that the professed adoption of an exclusive efficiency approach to Article 101 TFEU does not preclude but rather obfuscates the role of non efficiency considerations the author of this timely contribution accomplishes the following objectives traces the genesis of the shift to an efficiency orientation in EU and US antitrust policy and dispels several ingrained misconceptions that underpin it demonstrates the close interrelationship between evolving images of the purpose of antitrust the development of related enforcement norms and enforcement output provides in depth analyses of a number of analytically rich cases in the audiovisual sector and particularly those related to sports rights and explores what the role of non efficiency considerations in the application of Article 101 TFEU could and should be under the modernized enforcement regime

The Criminalization of European Cartel Enforcement

Peter Whelan,2014-08-07
Cartel activity is prohibited under EU law by virtue of Article 101 1 of the Treaty on the Functioning of the European Union Firms that violate this provision face severe punishment from those entities responsible for enforcing EU competition law the European Commission the national competition authorities and the national courts Stiff fines are regularly imposed on firms by these entities such firm focused punishment is an established feature of the antitrust enforcement landscape within the EU In recent years however focus has also been placed on the individuals within the firms responsible for the cartel activity It is increasingly recognized that punishment for cartel activity should be individual focused as well as firm focused Accordingly a growing tendency to criminalize cartel activity can be observed in the EU Member States The existence of such criminal sanctions within the EU presents a number of crucial challenges that need to be met if the underlying enforcement objectives are to be achieved in practice without violating prevailing legal norms For a start given the severe consequences of a custodial sentence the employment of criminal antitrust punishment must be justifiable in principle one must have a robust normative framework rationalizing the existence of criminal cartel sanctions Second for it to be legitimate antitrust criminalization should only occur in a manner that respects the mandatory legalities applicable to the European jurisdiction in question These include the due process rights of the accused and the principle of legal certainty Finally the correct practical measures such as a criminal leniency policy and a correctly defined criminal cartel offence need to be in place in order to ensure that the employment of criminal antitrust punishment actually achieves its aims while maintaining its legitimacy These three particular challenges can be conceptualized respectively as the theoretical legal and practical challenges of European antitrust criminalization This book analyses these three crucial challenges so that the complexity of

the process of European antitrust criminalization can be understood more accurately In doing so this book acknowledges that the three challenges should not be considered in isolation In fact there is a dynamic relationship between the theoretical legal and practical challenges of European antitrust criminalization and an effective antitrust criminalization policy is one which recognizes and respects this complex interaction Tax Transfer Pricing Andrea

Musselli,2022-09-15T00:00:00+02:00 The book pays attention to the tax treatment of transfer pricing in a single perspective of analysis since the most important principles the arm's length ALP i.e conditions that independent parties would share and the sale country are agreed worldwide They must be applied in the same way regardless of the economic sector or industry A country survey overlooks the most important issue of the fiscal problem that is the ability to project a unitary policy in compliance with the ALP or with the sale country principle and that should be audited by one sole only theoretically existing tax authority The practical part and examples disclose how rules should have been applied how legal proceedings can arise arose regarding their application how they were decided if litigation truly occurred and finally the author's motivated opinion with special focus on which is the breaking point of a specific analysis The term breaking point is used to explain which can be the factual and/or the interpretative change that is able to modify such analysis and thus the solution Extract from the preface of prof Reuven Avi Yonah this book is a must read for any serious student of the topic and an important contribution to understanding how the ALP is applied today as well as to how it should be applied It is an invaluable contribution and should be read widely by both tax lawyers and accountants and by tax policy makers **Books in Print**

Environmental and Health Risk Assessment and Management Paolo Ricci,2006-01-27 This textbook is about the law economics practical assessment and the management of risky activities arising from routine catastrophic environmental and occupational exposures to hazardous agents The textbook begins where emission and exposure analysis end by providing estimates or predictions of deleterious exposures Thus we deal with determining the nature and form of relations between exposure and response damage functions and with the principles and methods used to determine the costs and benefits of risk management actions from the vantage point of single and multiple decision makers Today national and international laws conventions and protocols are increasingly concerned with reducing environmental and health risks through minimizing exposure to toxic substances bacteria viruses and other noxious agents They do so through risk methods The reason for the now worldwide use of risk assessment and management is that individuals and society must decide when and at what cost past and future hazardous conditions can either be avoided or minimized In this process society must account for the limited resources it can spend to remain sustainable Risk based methods play a pivotal role in identifying and ranking alternative sustainable choices while accounting for uncertainty and variability Specifically most reductions in risks require a balancing of the costs and benefits associated with the action to reduce exposure to a hazard and thus risk This balancing necessarily

involves linking exposure and response through causation This essential aspect of risk assessment and management if done incorrectly can be costly to society **Microeconomics** Wyn Morgan,Michael L. Katz,Harvey S. Rosen,2006

Microeconomics European Edition offers comprehensive coverage of microeconomic theory explaining how this is used to analyse and evaluate contemporary market systems This European edition has been adapted from the well established US text to provide a thoroughly European approach to the subject The book draws on relevant real world examples to highlight how theory can help to solve or understand a range of problems and is a central basis for thinking like an economist The key features include Chapter Introductions outlining the main themes of the chapter and setting the scene for further discussion Modern topics such as game theory and asymmetric information which are given the same careful treatment as traditional issues Up to date European examples provided throughout the text drawing on a variety of contexts including housing education industry and agriculture **Books in Print Supplement** ,2002 *American Economic Journal* ,2009-02
