Proceedings of the Second Annual NASA Science Internet User Working Group Conference Lenore A. Jackson, J. Patrick Gary, 1991 Generation of Synthetic Workloads for Distributed Real-time Computing Systems Daniel Lee Kiskis, 1992
SWSL contains features to specify SWs for large systems and to support the process of conducting experiments We have also developed a generic SW driver that controls the distributed SW as it executes on the target system We demonstrate that the SW is capable of producing representative SWs and that it may be used for the experimental evaluation of a distributed real time system These demonstrations have been performed on two different real time computing systems thus showing the generality of the SW design *Advances in Real-time Systems* Sang H. Son, 1995 This text provides structured coverage of important areas involved in the design and development of real time systems It explores key issues and approaches and addresses essential requirements in designing and developing a large next generation real time system **NASA Conference Publication** , 1991 *Developer Magic* John Stearns, Carol Geary, 1995 HP/DDE Debugger User's Guide , 1996 Source level debugger user's guide A.
