Manufacturing System and Process Development for Vehicle Assembly He Tang, 2017-12-20 The evolution and execution of automotive manufacturing are explored in this fundamental manual. The book covers the major areas of vehicle assembly manufacturing and addresses common approaches and procedures of the development process. Having held positions as both a University Professor and as a Lead Engineering Specialist in industry, the author draws on his experience in both theory and application to fill the gap between academic research and industrial practices. This concisely written comprehensive review discusses the sophisticated principles and concepts of automotive manufacturing from development to applications and includes 250 illustrations and 90 tables. End of chapter review questions, Research topics for in depth case studies, literature reviews and or course projects, Analytical problems for additional practice. Directly extracted and summarized from automotive manufacturing practices, this book serves as an essential manual.
